Information Technology Project Management
June 03 2020
The 5th Edition of Jack Marchewka's Information Technology Project Management focuses on how to create measurable organizational value (MOV) through IT projects. The author uses the concept of MOV, combined with his own research, to create a solid foundation for making decisions throughout the project's lifecycle. The book's integration of project management and business concepts provides students with the tools and techniques they need to develop in this field.

Empowerment
Oct 25 2019
Gershon and Straub are the leaders of the Empowerment Workshop, an internationally recognized human potential training program. Now they present their program in this easy-to-use guide with methods for using affirmations, visualizations, and other metaphysical tools to achieve exactly what you desire out of life.

3D Math Primer for Graphics and Game Development
April 27 2022
This engaging book presents the essential mathematics needed to describe, simulate, and render a 3D world. Reflecting both academic and in-the-trenches practical experience, the authors teach you how to describe objects and their positions, orientations, and trajectories in 3D using mathematics. The book provides an introduction to mathematics for

Individual and Small Group Decision Apr 23 2022
making is one of the most important activities in both our professional and our private lives today. The literature on the subject has grown considerably over the last fifty years and it now encompasses many different approaches to the subject. These approaches range from that of creating a mathematical model of the decision situation under consideration, as in operations research and other forms of mathematical decision analysis, to those that are based on human and organizational behavior. Recently, those working in the field have begun to combine approaches to the study of decision situations that arise in organizations, in our personal lives and in the communities in which we live. This book is an attempt to assist those concerned with decision making to work with this combination of approaches. In the past, decision problems have been considered according to the conditions under which they arise and to some extent in terms of the approaches available for their resolution. Writers on the subject who are mathematically oriented have devised a method of classifying decisions based on the type of mathematics that they suggest be used in the resolution of the problems. This approach leads to the division of decision situations into the categories of certainty, uncertainty, risk and competition. Deterministic models available in operations research have then been offered as the means of treating decision situations in the category of certainty.

Web Services and Formal Methods Jun 01 2020 This book constitutes the thoroughly refereed post-proceedings of the

International Workshop on Web Services and Formal Methods WS-FM 2011, held in Clermont-Ferrand, France, in September 2011. The workshop was co-located with the 9th International Conference on Business Process Management, BPM 2011. All full papers presented were carefully reviewed and selected. 14 submissions. They deal with service oriented computing (SOC), cloud computing and formal methods.

Formal Methods and Software Engineering Aug 28 2022 This book constitutes the refereed proceedings of the 19th International Conference on Formal Engineering Methods, ICFEM 2017, held in Xi'an, China, in November 2017. The 28 revised full papers presented together with one invited talk and two abstracts of invited talks were carefully reviewed and selected from 80 submissions. The conference focuses on topics related to formal engineering methods, such as verification and validation, software engineering, formal specification and modeling, software security, and software reliability.

Recorder Express (Soprano Recorder Method for Classroom Individual Use) Nov 30 2022 Levels 1 and 2 for beginning recorder. Includes beginning music theory and more than 110 folk, pop, and original songs and exercises.

Software Product Lines Jan 09 2021 Software product lines are emerging as a critical new paradigm for software development. Product lines are enabling organizations to achieve impressive time-to-market gains and cost reductions. With the increasing number of product lines and product-line researchers and practitioners, the time is right for a comprehensive examination

of the issues surrounding the software product line approach. The Software Engineering Institute at Carnegie Mellon University is proud to sponsor the first conference on this important subject. This book comprises the proceedings of the First Software Product Line Conference (SPLC1), held August 28-31, 2000 in Denver, Colorado, USA. The twenty-seven papers of the conference technical program present research results and experience reports that cover all aspects of software product lines. Topics include business issues, enabling technologies, organizational issues, and life-cycle issues. Emphasis is placed on experiences in the development and fielding of product line complex systems, especially those that expose problems in design, development, or evolution of software product lines. This book will be essential reading for researchers and practitioners alike.

Oracle Database Programming with Visual Basic.NET 3
2021 Oracle Database Programming with Visual Basic.NET
Discover a detailed treatment of the practical considerations and applications of Oracle database programming with Visual Basic.NET 2019 Oracle Database Programming with Visual Basic.NET: Concepts, Designs, and Implementations delivers a comprehensive exploration of the foundations of Oracle database programming using Visual Basic.NET. Using Visual Basic.NET 2019, Visual Studio.NET 2019, and Oracle 18c XE, the book introduces the Oracle database development system, Oracle Developer and Modeler, and teaches readers how to implement a sample database solution. The distinguished author also demonstrates the use of dotConnect for Oracle to show readers how to create an effective connection to an Oracle 18c XE

database. The current versions of the .NET framework, ASP and ASP.NET 4.7 are also explored and used to offer readers most up to date web database programming techniques available today. The book provides practical example projects and detailed line-by-line descriptions throughout to assist readers in the development of their database programming skill. Students also benefit from the inclusion of: A thorough introduction to databases, including definitions, examples, descriptions of keys and relationships, and some database components in popular databases, like Access, SQL, and Oracle An exploration of ADO.NET, including its architecture and components, like the DataReader class, DataSet component, DataTable component and the command and parameter classes A discussion of Language Integrated Query (LINQ), including its architecture and components, its relationship to objects, DataSet, Oracle Entities An explanation of how to access data in ASP.NET and ASP.NET Web Services with multiple real project examples. Perfect for college and university students taking courses in database programming and applications, Oracle Database Programming with Visual Basic.NET will also earn a place in the libraries of programmers and software engineers seeking a comprehensive reference for database coding in Visual Basic.NET.

Harrison's Principles of Internal Medicine 19e 2019 THE NEW COLOR OF MEDICINE HUNDREDS OF DIAGRAMS AND CLINICAL PHOTOS INTEGRATED INTO THE TEXT – FOR THE FIRST TIME IN FULL COLOR *This description refers to the single-volume of Harrison's Principles of Internal Medicine, 16/e. The Harrison's name is synonymous with internal

medicine. HPIM continues to be the most authoritative and best-selling medical textbook throughout the world. From its unique section on signs and symptoms through to the most comprehensive coverage of most all conditions seen by physicians, Harrison's is the internal medicine reference of choice. Harrison's 16th Edition features new, expanded, revised and updated material on the key topics in medical practice. From the latest research findings to up-to-the-minute advances in diagnostic and treatment methodologies, Harrison's puts the information you need at your fingertips. The 16th Edition improves on a winning formula with:

- *State-of-the-art coverage of over 400 new diseases and disorders—more than any other internal medicine text – in the areas of oncology and hematology; infectious diseases; cardiology; pulmonology; gastroenterology; clinical immunology; rheumatology; endocrinology; and neurology
- *A brand new full color format—665 full color drawings, 175 color and laboratory images, and hundreds of boxes, tables, and algorithms that use color to guide you to the information you need ASAP in everyday patient care
- *Thorough revision and updates of virtually all chapters
- *The addition of key new chapters – including extensive new coverage of Critical Care Medicine
- *145 algorithms for making accurate clinical decisions fast at the point of care
- *1,160 easy-access tables for immediate access to vital information and formulas
- *Cardinal manifestations of disease/signs and symptoms in 55 chapters (you'll find yourself turning to this section over and over again)

Here you will find all the major manifestations, such as fever, pain, aches and rash, presented in depth, with a referral that takes you to the disease section for the complete chapter.

step ahead of everyday practice with the most authoritative, comprehensive, and useful guide to the entire spectrum of medicine.

Elements of Hebrew Syntax by an Inductive Method May 01 2020
Criminal Justice and Criminology Research Methods Dec 26 2021
Criminal Justice and Criminology Research Methods, 7th Edition, is an accessible and engaging text that offers balanced coverage of a full range of contemporary research methods. Filled with gritty criminal justice and criminology examples including policing, corrections, evaluation research, forensic feminist studies, juvenile justice, crime theory, and criminal justice theory, this new edition demonstrates how research relevant to the field and what tools are needed to actually do that research. Kraska, Brent, and Neuman write in a pedagogically friendly style yet without sacrificing rigor, offering balanced coverage of qualitative, quantitative, and mixed methods. With its exploration of the thinking behind scientific methods, its cutting-edge content, the text goes beyond the nuts and bolts to teach students how to competently critique as well as create research-based knowledge. This book is suitable for undergraduate and early graduate students in US and global Criminology, Criminal Justice, and Justice Studies programs, as well as for senior scholars concerned with incorporating the latest mixed-methods approaches into their research.

Immunohistochemistry Sep 28 2022
1. Introduction (S Renshaw)
2. Antibodies for immunochemistry (C Onley)
3. The selection of reporter labels (S Mardle)
4. Immunochemical staining techniques (S Renshaw)
5. Multiple immunochemical staining techniques (I Jones)
6. Confocal microscopy and

immunohistochemistry (M Cuttle) 7. Ultrastructural immunohistochemistry (J Skepper) 8. Image capture, analysis and quantification (D Tannahill) 9. Quality assurance in immunohistochemistry (P Jackson) 10. Automated immunohistochemistry (E Schenck) List of suppliers; Index

Multi-Agent Systems and Applications Sep 10-14 2020 The aim of the CEEMAS conference series is to provide a biennial forum for the presentation of multi-agent research and development. With its particular geographical orientation towards Central and Eastern Europe, CEEMAS has become an internationally recognised event with participants from all over the world. The successful CEEMAS conferences in St. Petersburg (1999), Cracow (2001) and Prague (2003), the 2005 CEEMAS conference takes place in Budapest. The programme committee of the conference series consists of established researchers from the region and renowned international colleagues, showing the prominent rank of CEEMAS among the leading events in multi-agent systems. In the very competitive field of agent oriented conferences and workshops nowadays (such as AAMAS, WI/IAI, MAS, CIA, MATES) the special profile of CEEMAS is that it is trying to bridge the gap between applied research achievements and theoretical research activities. Our ambition is to provide a forum for presenting theoretical research with an evident application potential, implemented application prototypes and their properties, as well as industrial case studies of successful (and also unsuccessful) agent technology deployments. This is why the CEEMAS proceedings volume provides a collection of research and application papers. The technical research paper section of the proceedings (see pages 11-499) contains pure research

papers as well as research results in application settings within the application papers section (see pages 500–530) contain application papers focused on application aspects. The goal is to demonstrate the real life value and commercial reality of multi-agent systems as well as to foster communication between academia and industry in this field.

Tribal Criminal Law and Procedure Nov 06 2020 This text is a comprehensive introduction to tribal criminal law and procedure in the United States. Garrow and Deer discuss in depth the histories, structures and practices of tribal justice systems, comparisons of traditional tribal justice with Anglo-American law and jurisdictions, elements of criminal law and procedure, and alternative sentences and traditional sanctions. *Tribal Criminal Law and Procedure* will be an invaluable resource for legal scholars and students.

MCSE SMS Sep 16 2021 A study guide to the Microsoft certification exam on its client-server software that runs under Windows NT and uses an SQL Server database. After explaining the nature of the exams and suggesting strategies for taking them, reviews such tasks as planning and designing an SMS hierarchy, distributing software to clients, and optimizing and tuning a server. Annotation copyrighted by Book News, Inc., Portland, OR

DNA Microarray Feb 07 2021 Covers the very latest in DNA microarray technology, with a clear focus on how these techniques can be used in the lab to gain the very best results. The authors are from some of the leading laboratories in the field and write with real authority on the latest methodology and its applications. Every chapter provides detailed step-by-step protocols with valuable hints and tips for success, as well

giving typical experimental results and selected literature citations. A manual for researchers in all fields of biology, medicine and agriculture.

Bioinformatics Aug 23 2019 "Bioinformatics: Methods Express is a book on bioinformatics that is aimed at non-bioinformaticians. The book helps you answer common questions such as: which gene is similar to my gene? Does this protein have any transmembrane regions? How do I visualize an alignment between these DNA sequences? Where can I find specific transcription factor sequences?" This book provides the advice and protocols that non-bioinformaticians need in order to understand what to do - and how to avoid common pitfalls. Topics covered include: data access; sequence searches and alignments; the transcription of DNA to RNA; protein structure and function; and comparisons and phylogenetics. "Bioinformatics: Methods Express is a manual for all wet-bench scientists who need to use bioinformatics - from postgraduate student to principal investigator."--BOOK JACKET.

Express Gazette-journal Jan 13 2021

Rights-based Integrated Child Protection Service Delivery System Feb 28 2020 The Sourcebook-IV provides training modules for rights-based integrated child protection service delivery systems at the secondary and tertiary prevention levels. Part 1 of the Sourcebook focuses on the preventative, comprehensive, integrated and systemic, and universal community-based and family-based service delivery systems for children; and the methods of case management and outcome-based project cycle. Part 2 discusses children and families and the role of community-based Integrated Childcare and Support Centres for providing supplementary care and support.

services to them at the secondary prevention level. It also on children facing sociolegal problems such as deprivation of parental care, violence, and conflict with law, and the role of District-based Integrated Child Protection Centres for providing protection, justice and rehabilitation to them at the tertiary prevention level. Part 3 focuses on children in emergencies in general and in specific situations and role of Integrated Child Protection Centres in these situations. This is a necessary reading for social workers, lawyers, researchers, trainers and teachers working on child rights across the world, and especially in developing countries.

New Trends in Software Methodologies, Tools and Techniques
Jan 21 2022 Software is the essential enabler for the new economy and science. It creates new markets and new directions for a more reliable, flexible, and robust society. It empowers exploration of our world in ever more depth. However, software often falls short behind our expectations. Current software methodologies, tools, and techniques remain expensive and yet unreliable for a highly changeable and evolutionary market. Many approaches have been proven only as case-by-case oriented methods. This book presents a number of new theories in the direction in which we believe software science engineering may develop to transform the role of software science in tomorrow's information society. This publication attempt to capture the essence of a new state of art in software science and its supporting technology. It also aims at identifying the challenges such a technology has to master.

The Illustrative Practical Arithmetic by a Natural Method ...
11 2021

Qualitative Methods May 25 2022 This book aims to provide researchers who are new (or relatively new) to qualitative research with the methodological tools and conceptual maps they need to navigate their way through the process. It describes the uncertainties surrounding qualitative research and the many dilemmas faced by researchers. It illustrates these by drawing on the experiences of researchers with varying degrees of experience in qualitative research. It also provides readers with the necessary background knowledge and raises their awareness of the questions they will need to address to help them make informed decisions about how to deal with these uncertainties and dilemmas. The contents of the book are organized in a way that reflects the three main objectives that the authors had in mind. The first objective was to provide readers with the necessary background knowledge and an awareness of the questions they will need to address in order to make informed decisions about whether to conduct qualitative research and if they decide to follow a qualitative path, which particular qualitative approach(es) would be suited to their research goals. The second objective was to equip readers with the basic tools to carry out their analysis by providing detailed, contextualized coverage of the practicalities of the qualitative methods/approaches. In addition, the book includes accounts of an actual analysis of a specific data set in a step-by-step manner using the approaches. The third objective was to provide the reader with guidance on how to write up qualitative research in general and the ethical considerations of qualitative inquiry in the concluding chapter.

Productivity Theory for Industrial Engineering Aug 16 2021 The mathematical models of productivity theory allows for the

productivity rate of manufacturing machines and systems to be modelled with results that are validated by their actual output. This book presents the analytical approaches and methods used to define maximal productivity rate of manufacturing machines and systems, based on the parameters of technological processes, structural design, reliability of mechanisms, and management systems.

Handbook of Seismic Risk Analysis and Management of Civil Infrastructure Systems
On 25 2022 Earthquakes represent a major risk to buildings, bridges and other civil infrastructure systems, causing catastrophic loss to modern society. Handbook of seismic risk analysis and management of civil infrastructure systems reviews the state of the art in the seismic risk analysis and management of civil infrastructure systems. Part one reviews research in the quantification of uncertainties in ground motion and seismic hazard assessment. Part two discusses methods used in seismic risk analysis and management, whilst parts three and four cover the application of seismic risk assessment to buildings, bridges, pipelines and other civil infrastructure systems. Part five also discusses methods for quantifying dependency between different infrastructure systems. The final part of the book considers ways of assessing financial and other losses from earthquake damage as well as setting insurance rates. Handbook of seismic risk analysis and management of civil infrastructure systems is an invaluable guide for professionals requiring an understanding of the impact of earthquakes on buildings and lifelines, and the seismic risk assessment and management of buildings, bridges and transportation. It also provides a comprehensive overview of seismic risk analysis for researchers.

and engineers within these fields. This important handbook reviews the wealth of recent research in the area of seismic hazard analysis in modern earthquake design code provision practices Examines research into the analysis of ground motion and seismic hazard assessment, seismic risk hazard methodologies Addresses the assessment of seismic risks to buildings, bridges, water supply systems and other aspects of infrastructure

Documents of the Senate of the State of New York 2022
How to Conduct Qualitative Research in Social Science 2021 Explaining both the theoretical and practical aspects of doing qualitative research, the book uses examples from real world research projects to emphasise how to conduct qualitative research in the social sciences. Pranee Liamputtong draws together contributions covering qualitative research in cultural and medical anthropology, sociology, gender studies, political science, criminology, demography, economic sciences, social work, and education.

Contraception for Adolescent and Young Adult Women 2020 Forty-five percent of adolescents ages 15-19 have had sexual intercourse. By age 19, 75% of all adolescents have had sexual intercourse. Most adolescents select condoms as the most reliable method of contraception. The United States continues to rank among the highest of all similarly developed countries in rates of adolescent pregnancy, and the unintended pregnancy rate is highest among women ages 20-24. The reasons for these health statistics are myriad, but a major issue is that adolescent and young women use contraception inconsistently. Thus, there is a need for youth to learn about and use contraception consistently.

and effectively. Unfortunately, misinformation abounds, even among practicing clinicians. Young people need a clinician who is up to date on clinical recommendations regarding contraceptive care. The busy clinician needs information at her fingertips, needs to know how to create a teen-friendly environment and must exhibit best contraceptive counseling practices. Gynecologists and primary care practitioners (as well as family physicians, adolescent medicine physicians and pediatricians) are on the front lines when it comes to discussing, recommending and prescribing contraceptive options to adolescent and young women. This book is a valuable resource for these clinicians; it is the only handbook on the market on contraception for the adolescent and young adult women and is filled with evidence-based information in an easy to read and easy to digest format. Now is an optimal time for a book of this sort. The Centers for Disease Control and Prevention just completed a clinical guideline for contraceptive care based on the World Health Organization's Medical Eligibility Criteria (MEC) for The United States. The United States MEC seeks to demystify contraceptive care for all women. It also lays the groundwork for helping providers to improve clinical practice in contraceptive care. Contraception for Adolescent and Young Adult Women will complement these efforts in a manner tailored to the unique needs of this population.

The Standard Penal Code of the State of California 2020 1963-1978 include The New multiple index to the civil, civil procedure, evidence probate, penal codes, rules of court (various) Annual Report of the Regents 23 2022 No. 104-117 contains also the Regents bulletins.

Verbatim Report of the Regular Annual Meeting 2019

Children, Film and Literacy Mar 11 2021 Children, Film and Literacy explores the role of film in children's lives. The film children engage in provide them with imaginative spaces in they create, play and perform familiar and unfamiliar, fantas and everyday narratives and this narrative play is closely connected to identity, literacy and textual practices. Family to the encouragement of this social play and, at school, the playground is also an important site for this activity. Howe the literacy classroom, some children encounter a discontin between their experiences of narrative at home and those valued in school. Through film children develop understanding of the common characteristics of narrative and the particul 'language' of film. This book demonstrates the ways in which children are able to express and develop distinct and compl understandings of narrative, that is to say, where they can on their own experiences (including those in a moving imag form). Children whose primary experiences of narrative are moving images face particular challenges when their experi are not given opportunities for expression in the classroom this has urgent implications for the teaching of literacy.

Leveraging Applications of Formal Methods, Verification and Validation. Specialized Techniques and Applications Mar 30 2020 The two-volume set LNCS 8802 and LNCS 8803 con the refereed proceedings of the 6th International Symposium Leveraging Applications of Formal Methods, Verification and Validation, ISoLA 2014, held in Imperial, Corfu, Greece, in October 2014. The total of 67 full papers was carefully rev and selected for inclusion in the proceedings. Featuring a tr introduction to each section, the papers are organized in to

sections named: evolving critical systems; rigorous engineering of autonomic ensembles; automata learning; formal method analysis in software product line engineering; model-based generators and compilers; engineering virtualized systems; statistical model checking; risk-based testing; medical cyber physical systems; scientific workflows; evaluation and reproducibility of program analysis; processes and data integration in the networked healthcare; semantic heterogeneity in the formal development of complex systems. In addition, contains a tutorial on automata learning in practice; as well as the preliminary manifesto to the LNCS Transactions on the Foundations for Mastering Change with several position papers. Part II contains information on the industrial track and the doctoral symposium and poster session.

Handbook of Research on Mixed Methods Research in Information Science
Oct 18 2021 Mixed methods research is becoming prevalent in many fields, yet little has been done to elevate mixed methods research in information science. A comprehensive picture of information science and its problems is needed to further understand and address the issues associated with it as well as how mixed methods research can be adapted and used. The Handbook of Research on Mixed Methods Research in Information Science discusses the quality of mixed methods studies and methodological transparency, sampling in mixed methods research, and the application of theory in mixed methods research throughout various contexts. Covering topics such as the issues and potential directions for further research in mixed methods, this comprehensive major reference work is essential for researchers, policymakers, academicians, librarians,

practitioners, instructors, and students.

PCR: Methods Express is an 01 2023 PCR is the most widely used technique in molecular biology. New PCR variants offering substantial benefits to existing protocols appear on a frequent basis. PCR: Methods Express describes the very latest PCR-based methodologies and approaches to provide the most up-to-date practical advice on how to tackle a broad range of biological problems including: *real time qRT-PCR *rapid generation of gene targeting constructs *PCR multiplexes *base-based mutagenesis *identification of microdeletions and microduplications *DNA methylation analysis *forensic gene DNA typing *genotyping *identification of mutations in single cells *whole genome amplification *diagnosis of infectious diseases *inverse PCR-based RFLP This book is a comprehensive research guide; every chapter discusses the merits and limitations of the available approaches and then provides fully-proven protocols with hints and tips for success. PCR: Methods Express is an essential laboratory manual for researchers in all life science fields and at all levels, from postgraduate student to principal investigator.
