Manual on human rights and the environment - 2nd edition May 31 2020 Human rights and the environment have become increasingly interconnected. This updated manual seeks to contribute to a better understanding of this relationship by taking into account the new pertinent case law of the European Court of Human Rights. While the European Convention on Human Rights does not guarantee a specific right to a healthy and sound environment, the general standards deriving from it may nonetheless also apply to environmental matters. The European Court of Human Rights regularly examines complaints in which individuals argue that a breach of their Convention rights is the result of adverse environmental factors. This manual also takes account of the relevant decisions of the European Committee of Social Rights which has interpreted the right to protection of health under the European Social Charter as including a right to a healthy environment. Examples of good national practices have been compiled on the basis of the contributions of several member states and included in an appendix to the manual. The aim is to present the emerging principles on environmental protection in a systematic and accessible way.

The Competition Car Data Logging Manual Aug 03 2020 At last. A practical handbook on how to choose and operate datalogging equipment and get the full benefit from what it tells you. Aimed at the amateur competitor, it covers hardware and software and takes over where the manufacturers instructions run out. It shows how to understand what the data is telling you and how to use it to go faster. It covers standard information screens and shows you how to create your own charts and tables that will illuminate the performance of both the car, the driver and the team. On the way, it deals with systems management issues, how to get the quick and easy payoffs, and how to benefit in the long term. It explains how sensors work, how to fit them so they survive and to calibrate them. The final chapter is a Field Guide designed to help you run the system, trouble-shoot hardware and software problems and quickly interpret the output of the graphs under pressure during an event.
