This book is based around the author's beautiful and sometimes awe-inspiring color images and mosaics of deep-sky objects. The book describes how similar "Hubble class" images can be created by amateur astronomers in their back garden using commercially available telescopes and CCD cameras. Subsequent processing and image enhancement in the "electronic darkroom" is covered in detail as well. A range of telescopes and equipment is considered, from the author's 11-inch with Hyperstar camera, down to more affordable instruments. Appendices provide links to free software -- not available from a single source -- and are themselves an invaluable resource. The continuing story of the fictional adventures of a Navy Combat Camera team covering action in Vietnam. Their assignments include documenting, in still and motion pictures, the various actions by Navy and Marine units fighting in-country and on the surrounding seas. Their grip on keeping their sanity in an insane environment depends on hanging onto their sense of humor while fulfilling their photo missions under very difficult conditions. An ornate Victorian manor sat in picturesque surroundings overlooking the River Thames at Medmenham, Buckinghamshire. Perhaps not the first place that springs to mind when considering the top-secret photographic interpretation that helped secure an Allied victory in the Second World War, but this was the headquarters of the Allied Central Interpretation Unit. It was here that air photography from all over enemy-occupied Europe was pored over by photographic interpreters, who sought out intricate details of enemy activity which then influenced virtually every Allied operation of the war. These quick-minded men and women were the ones to find out where the infamous German V-weapons were being constructed, were the first to see the results of the Dambusters' raid and were sworn to utmost secrecy on everything they viewed. Women made up half of this work force and were, unusually, treated as equals with their male counterparts: the best person for the job, regardless of gender. Here the women of Medmenham, the 'Women of Intelligence' from Churchill's daughter to girls escaping home for the first time, tell the story of their wartime life and work -- in their own words. The future is ours - let's enjoy it! After all those years of routine you're suddenly free. No more being bossed about - well, apart from by your other half, of course. And no more wage slavery - er, no more wages! This charming book will help ease you into this strange and perplexing new stage of your life. My passion and inspiration for writing Beautiful Is America was inspired by a young lady by the name of Dorothy Washington, who asked me to take her wedding pictures. This was a dream come true. During that time, I owned a Polaroid camera and was not prepared for taking pictures. Dorothy said it was all she could afford. This was the beginning of my photography career. I have been taking pictures from that day to the present. As I continued to pursue my dream, I decided that I would like to start a business in photography, and the name of the business would be L. K. Photography. I begin to take wedding pictures, school pictures, pictures at church conventions, and souvenir pictures. After working over forty years as a photographer, I retired from General Motors with thirty-four years of service. My wife retired from St. John Hospital after twenty-eight years of service. We moved to Powder Springs, Georgia, after retirement. Once again, I started a new business in Georgia and changed the name to L. K. Photosop. My wife and I began to work with day care services. We had fourteen day-care clients. We retired five years later for the second and final time. God has blessed us in the past and continues to do so. We are very blessed to be able to travel and see beautiful scenery around the world. We have traveled to all fifty states, enjoying and taking pictures of rock formations, magnificent waterfalls, lighthouses, the US Presidential Library and Museums, and historic sites. It is a joy and our desire to share this book with family and friends and the people of this great country. Many people need help planning for retirement, saving, investing, and decumulating their assets, yet financial advice is often complex, potentially conflicted, and expensive. The advent of computerized financial advice offers huge promise to make accessible a more coherent approach to financial management, one that takes into account not only clients' financial assets but also human capital, home values, and retirement pensions. Robo-advisors, or automated on-line services that use computer algorithms to provide financial advice and manage customers' investment portfolios, have the potential to transform retirement systems and peoples' approach to retirement planning. This volume offers cutting-edge research and recommendations regarding the impact of financial technology, or FinTech, to disrupt retirement planning and retirement system design. When retirees rid their schedules of anything resembling the kinds of obligations that once had been imposed by work, they will experience a sometimes-uncomfortable absence of structure. In The Experience of Retirement, the distinguished sociologist Robert S. Weiss provides a detailed description of how some people plan their retirement, what life in retirement is like, and what makes for a fulfilling retirement. His engaging book can thus serve as a most useful guide. Weiss shows us both retirement's benefits and its possible costs, both the relief retirees can feel once free of work's stresses and constraints and the discomfort that can be caused by loss of the positive aspects of working life. The book is based on extensive interviews with eighty-nine men and women before and after their retirement from middle-income careers. Weiss makes vivid their experiences by presenting, in their own words, their descriptions of leaving their careers, considering what to do with their time, confronting issues of income in retirement, dealing, sometimes, with social isolation, and reorganizing their lives. The interviews reveal the way in which retirement affects marriages and other familial relationships. Weiss concludes by presenting advice about retirement based on the actual experiences of retirees. For anyone approaching the age of retirement or already retired and looking for a more satisfying post-career life, for personnel managers, health care professionals, and all those who provide services for the retired, The Experience of Retirement will be an illuminating guidebook to this phase of life. Written by a 34-year veteran of the retirement planning industry, BPRP is designed to be your go-to guide for everything to build your successful retirement plan. It would be absurd to put a 1,000-piece puzzle together without the picture. Sketches is a highly personal and intimate volume. It embraces sketches, idea outlines, notebook pages... Nothing in this book has been selected by chance, even if it does not follow any specific timeline. It contains what Javier Mariscal has wanted it to contain, using a selection process in which he himself has played with the images and shuffled them around until "they all sit happily with each other". Mariscal, in addition to rescuing these pictures from their retirement in old folders, decided to add a narrative describing in words the way he draws and he regales us with snippets of his life "in pictures" that provide the clues to understanding why drawing has helped him live his life, as well as inspiring those of us who have had the good fortune to be at the receiving end of his talent.
