Politics and Consensus in Modern Britain Nov 25 2019

Diagnostic Nuclear Medicine Jul 26 2022 The gold standard text-reference Diagnostic Nuclear Medicine is now in its Fourth Edition--with a sharp clinical focus, a streamlined new single-volume format, and a very attractive price. Written by the top authorities in the specialty, this brand-new edition offers encyclopedic coverage of clinically relevant developments in nuclear medicine--including instrumentation, radiopharmaceuticals, and applications. Readers will find the latest on PET, molecular imaging, SPECT myocardial perfusion imaging, monoclonal antibody therapy, and the use of functional imaging studies in oncology. This edition has been trimmed from two volumes to one, so that readers can find exactly what they need quickly, without cross-checking between volumes.

Level of Use and Effectiveness of some Select Method of Teaching Economics in Secondary Schools Dec 27 2019 Bachelor Thesis from the year 2010 in the subject Education - Educational Tests & Measurements, grade: 1.0, University of Lagos (-), language: English, abstract: [...] According to Kidzu Thomas Oweh, teacher has the greatest potential to influence the student's education, while a student achievement is related to teacher's competence in using different methods of teaching. Thus, students achieve more when teachers employ systematic teaching procedures that make teaching and learning processes easier. In other words, excellent academic performance by students is not only attainable but could also be sustained through teacher method of teaching. These study therefore, examine the level of use and effectiveness of some selected methods of teaching economics in Lagos state secondary schools, specifically how teacher's effectiveness would bring about excellent academic performance through appropriate use of method of teaching. The purpose of these research works are stated below: i. To ascertain how learner attitude affect the method of teaching the students. ii. To identify the teaching methods, their academic performance and the factors affecting the students. iii. To evaluate the effects of method of teaching economics on the performance of students. iv. To examine the teacher methods of teaching and their qualification. v. To know the relationship between teacher methods and learning experience. vi. To establish relationship between teacher's methods of teaching economics and learner academics achievement.

Careers Education and Guidance May 31 2020 This text reviews the current scene in careers education and examines a range of different approaches in practice. It seeks to show how staff can use and adapt these ideas to implement change and improve careers education.

THE EFFECTIVENESS OF WHOLE BODY CRYOTHERAPY (WBC) BASED ON PERCEIVED RECOVERY AND PERFORMANCE MEASUREMENT AFTER RECOVERY EXERCISE AMONG INJURED ATHLETES Dec 31 2022 The chapter defines Introduction, Recovery, significance of recovery, recovery enhancement techniques for athletes, WBC, recovery assessment techniques, factors affecting recovery, recovery assessment scales, performance, components of sports performance, basic sports performance variables, performance measurement in athletes, order of assessment of performance, performance assessment tools and sports injuries.. The chapter also presents statement of the problem, significance and objectives of the study. It formulates Hypotheses. Finally, the operational definitions are presented. 1.0.0 INTRODUCTION Sport is an integral part of life for most people on this planet, therefore majority of people are involved in the field of sport without any doubt. Introgession to any field of sport gives you a new perspective to have more supervision on the performance as well as output of athletes. Nowadays, the vital role of recovery and restoration of athletes in various sport teams have been proved and on the other hand, due to consecutive matches and sequential sports events, the expectations of coaches to achieve immediate upshot are increased which could be effected on athlete's results as well as their recovery level.

Sustainable Resource Management and Resource Use Sep 23 2019 This book contains the papers presented during an expert meeting, organized by the Advisory Council for Research on Nature and the Environment (RMNO). Dutch views were confronted with the views of international experts

School Effectiveness and School-based Management Sep 03 2020 The aim of this book is to bridge the widening gap between ongoing educational reforms and the lack of advances in knowledge, research and practice. Included is a description of new mechanisms in fields such as leadership, staff development and curriculum change.

Whole Language Apr 22 2022 This book presents a debate between "reasonable" educators who either claim that there is evidence for the effectiveness of whole language, or who challenge the claim that whole language works across the broad spectrum of learners. The book presents the debate in the form of formal debate resolutions, opening "statements," transcripts of a "face-to-face shoot-out" at a convention of the National Reading Conference in San Antonio, Texas, further written responses, and commentary on the debate. Contents of the book are: "And the Winner Is..." The Context of the Debate" (Carl B. Smith); "Call Me Teacher" (Susan Ohanian); "Whole Language and Research: The Case for Caution" (Michael C. McKenna and others); "Moderator's Comments" (Carl B. Smith); "The Answer Is Yes..." (Patrick Shannon); "Unlike Patrick, We Do Accept Reality..." (Michael McKenna); "Who the Hell Are You?" (Susan Ohanian); "Let Us Not Permit Ourselves to Be Forced into Bitterly Polarized Positions..." (Richard Robinson); "Audience Participation" (moderated by Carl B. Smith); "People Who Live in Glass Houses..." (Patrick Shannon); "Emerging Perspectives on Whole Language" (Michael C. McKenna and others); "Whole Language: Now More Than Ever" (Shelley Harwayne); "Is Whole Language 'The Real Thing'?" Advertisements and Research in the Debate on Whole Language" (Steven Stahl); "New Questions, Different Inquiries" (Jerome Harste); and "Commentary on the ERIC Whole Language Debate" (Michael Pressley). A selected, annotated bibliography of approximately 1,000 items from the ERIC database concerning whole language is included. (RS)

Nuclear Science Abstracts Mar 29 2020 NSA is a comprehensive collection of international nuclear science and technology literature for the period 1948 through 1976, pre-dating the prestigious INIS database, which began in 1970. NSA existed as a printed product (Volumes 1-33) initially, created by DOE's predecessor, the U.S. Atomic Energy Commission (AEC). NSA includes citations to scientific and technical reports from the AEC, the U.S. Energy Research and Development Administration and its contractors, plus other agencies and international organizations, universities, and industrial and research organizations. References to books, conference proceedings, papers, patents, dissertations, engineering drawings, and journal articles from worldwide sources are also included. Abstracts and full text are provided if available.

The Cost Effectiveness of Whole School Reforms. Urban Diversity Series - Scholar's Choice Edition Oct 29 2022 This work has been selected by scholars as being culturally important, and is part of the knowledge base of civilization as we know it. This work was reproduced from the original artifact, and remains as true to the original work as possible. Therefore, you will see the original copyright references, library stamps (as most of these works have been housed in our most important libraries around the world), and other notations in the work. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work.As a reproduction of a historical artifact, this work may contain missing or blurred pages, poor pictures, errant marks, etc. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.

Professional Care for the Elderly Mentally Ill Dec 07 2020 Services to older people with mental health problems have gone through radical change in recent years. Legislation has had a profound effect by dictating how care to older people is delivered both within hospital and within the community. The recent government agenda emphasizes cost effectiveness, value for money and accountability. This, too, is an important driving force in re-evaluating the service, although not everyone would agree with many of the proposed strategies and there are clearly different views as to the appropriateness of many of the services. One thing is certain, however - the move towards interdisciplinary working is here to stay. Not all change has been led by legislation, and many innovations have been founded in the day-to-day practices in the care of older people with mental health problems. A service, of course, does not become integrated merely by imposing joint working on a number of professionally based disciplines, and in many ways this may not be desirable. At its worst it produces duplication, where people from different backgrounds are all doing the same job. This is not the intention of joint-working, instead it should attempt to improve the quality of service by a rich mix of skills and experience from a number of related disciplines.

At the Crossroads Feb 18 2022 First published in 1997. This book examines recent and contemporary trends in training teachers in special educational needs. It views initial teacher education and subsequent professional development as part of a continuum in which significant opportunities exist for innovation. It presents a series of chapters in support of this optimistic stance which provide practical examples of effective ways of working, written by authors who have direct experience in the field. For student teachers, tutors, lecturers and school-based mentors in both general subjects and SEN.

Small Groups Aug 03 2020 Research on small groups is highly diverse because investigators who study such groups vary in their disciplinary identifications, theoretical interests, and methodological preferences. The goal of this volume is to capture that diversity, and thereby convey the breadth and excitement of small group research by acquainting students with work on five fundamental aspects of groups. The volume also includes an introductory chapter by the editors which provides an overview of the history of and current state-of-the-art in the field. Together with introductions to each section, discussion questions and suggestions for further reading, make the volume ideal reading for senior undergraduate and graduate students interested in group dynamics.

Label-free Learning Aug 27 2022 Teachers as well as students benefit when reliable, proven teaching strategies are applied. The area of special education is not an exception, and as more classroom teachers are becoming involved with children who have learning disabilities, they are finding ways to extend their teaching techniques to reach these students and make them part of the classroom community. With a focus on literacy development, Charlotte Keefe uses the principles of whole language to view these learners and their learning needs from a positive perspective. With a rich combination of theory, demonstrations, teaching strategies, methods of evaluation, and real teachers' experiences, she demonstrates how to view children with learning difficulties as readers and writers without measuring their worth against arbitrary standards of "average" or grade-level performance. Using real classroom examples, she discusses ways of establishing a learner-centered literacy program that supports individual learners' needs without resorting to traditional labels for those who perform "below average" in reading and writing. By avoiding the deficit model, she provides a new viewpoint for evaluating progress and writing IEPs. And, extending the idea of community beyond the classroom, she offers suggestions for collaborating with other teachers and parents to ensure continuity of support. Here are ideas as well as encouragement for teachers who want to change their reading and writing programs from a curriculum-centered to a learner-centered approach and who are looking for alternatives to traditional curriculums. Label-Free Learning is a valuable resource of practical, hands-on knowledge, whether it is used in an inservice workshop or as a text in preservice special education courses.

Effective Teaching Jul 14 2021 Looks at research in teacher effectiveness and provides strategies to achieve student's goals.

Resources in Education Mar 22 2022

Introducing the Controlling Effectiveness Model Feb 27 2020 Focusing on the controlling management method, this book considers the conditions that must be met within a given organization in order for controlling to achieve the desired level of product quality, allowing it to enhance the performance of the organization as a whole. The book describes the influence of each identified group of conditions on the Controlling Effectiveness Model and includes empirical research, conducted at various organizations operating in Poland, that verifies its theoretical assumptions. In terms of analyzing the empirical data, description and statistical inference methods were used, such as students' t-test scores for independent samples, non-parametric r-Pearson correlation and linear regression analysis. Additionally, the book includes moderators and mediators executed using Process Macro for SPSS by Hayes, and multigroup path analysis executed using SPSS AMOS.

Schools Can Change Mar 10 2021 Build a dynamic system for change! From NCLB to Common Core standards, we are inundated with directives for improving our schools. How can we really create lasting change? By applying the Change Creation system! Learning community pioneers Dale Lick, Karl Clauset, and Carlene Murphy lead teachers, principals, and schools in this dynamic approach to school improvement. With a free, comprehensive online collection of practical resources, this book shows you how to: Develop the right vision, relationships, and culture to create and sustain change Model learning-inquiry cycles for action teams for success Build loyalty, trust, and responsibility within your teams and across the school

Effectiveness of Whole Body Vibration with Physical Therapy for Spasticity and Gait in Children with Cerebral Palsy Nov 29 2022

Enlightenment to Enlightenment Oct 24 2019 This book is a thorough and critical, comparative analysis of the logic of modern scientific thought and of traditional teachings generally referred to as mythological and mystical. Different rationalities with different domains of interest and legitimacy exist, which should not be confused and cannot be unified in any theory of "Ultimate Reality." Atlan suggests they must coexist in practice, although each of them presents itself as an exclusive and all-encompassing truth. The book introduces teachings from Jewish talmudic, midrashic, and kabbalist sources and text from Zen and Taoism to exemplify the kind of rationality or controlled irrationality at work in such traditional thinking.

Official Report Apr 10 2021

Meta-Analysis, Decision Analysis, and Cost-Effectiveness Analysis Dec 19 2021 Meta-analysis, decision analysis, and cost-effectiveness analysis are the cornerstones of evidence-based medicine. These related quantitative methods have become essential tools in the formulation of clinical and public policy based on the synthesis of evidence. All three methods are taught with increasing frequency in medical schools and schools of public health and in health policy courses at the undergraduate and graduate level. This book is a lucid introduction, and will serve the needs of students taking introductory courses that cover these topics. It will also be useful to clinicians and policymakers who need to understand the quantitative underpinnings of the methods in order to best apply the information that derives from them. The second edition of this popular book adds new material on cumulative meta-analysis as a method to explore heterogeneity. The coverage of cost-effectiveness analysis has been brought into close alignment with recommendations of the U.S. Public Health Panel on Cost-Effectiveness Analysis in Health and Medicine. Many of the examples have been replaced with more current examples, and all of the material has been updated to reflect recent advances in the methods and the emergence of consensus about some previously controversial issues. analysis. These three closely related methods have become even more important for synthesizing research since the first edition was published in 1994. And they have gained legitimacy as tools for guiding health policy.

Advances in Building Technology Jan 08 2021 This set of proceedings is based on the International Conference on Advances in Building Technology in Hong Kong on 4-6 December 2002. The two volumes of proceedings contain 9 invited keynote papers, 72 papers delivered by 11 teams, and 133 contributed papers from over 20 countries around the world. The papers cover a wide spectrum of topics across the three technology sub-themes of structures and construction, environment, and information technology. The variety within these categories spans a width of topics, and these proceedings provide readers with a good general overview of recent advances in building research.

Current Population Reports Feb 06 2021

An evaluation of teacher effectiveness of a Hong Kong secondary school Jan 20 2022 Master's Thesis from the year 2009 in the subject Pedagogy - The Teacher, Educational Leadership, grade: A, , language: English, abstract: In this study, the relationship between collective teacher effectiveness and school improvement oriented culture is investigated through the case of ABC Secondary School. Collective teacher effectiveness is conceptualized with both the model of total teacher effectiveness and the model of continuous learning. Collective teacher effectiveness is regarded as the primary goal the school strives to attain. On the other hand, school improvement oriented culture, which consists of an emphasis on learning, collegiality and collaboration, is regarded as the value system of the school. Moreover, the theoretical framework of this study includes characteristics of teachers (gender, age, and full-time teaching experience) and the practices of academic divisions (the frequency and contents of formal meetings, the encouraged activities, and the opportunities to participate in the decision-making process). The research findings support the conceptions of collective teacher effectiveness and school improvement oriented culture. The results show that school improvement oriented culture, in general, caused collective teacher effectiveness directly and indirectly. Particularly, each cultural element had different influential powers to collective teacher effectiveness, competence and performance. As a result, a general model and three sub-models of collective teacher effectiveness for ABC Secondary School were constructed. These findings also question the mechanism of goal-attainment proposed by the theory of social system and provide us with a way to revise the current model of total teacher effectiveness. The recommendations to ABC Secondary School, the limitations of this study and the suggestions for further research are also discussed in this report.

Human Centered Design Jan 26 2020 The 13th International Conference on Human-Computer Interaction, HCI International 2009, was held in San Diego, California, USA, July 19-24, 2009, jointly with the Symposium on Human Interface (Japan) 2009, the 8th International Conference on Engineering Psychology and Cognitive Ergonomics, the 5th International Conference on Universal Access in Human-Computer Interaction, the Third International Conference on Virtual and Mixed Reality, the Third International Conference on Internationalization, Design and Global Development, the Third International Conference on Online Communities and Social Computing, the 5th International Conference on Augmented Cognition, the Second International Conference on Digital Human Modeling, and the First International Conference on Human Centered Design. A total of 4,348 individuals from academia, research institutes, industry and governmental agencies from 73 countries submitted contributions, and 1,397 papers that were judged to be of high scientific quality were included in the program. These papers - dress the latest research and development efforts and highlight the human aspects of the design and use of computing systems. The papers accepted for presentation thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

International Beliefs and Practices That Characterize Teacher Effectiveness Sep 15 2021 Research surrounding teacher quality and teacher effectiveness has continued to grow and become even more prominent as teaching has become more professionalized globally and countries have invested more comprehensively in teacher education, certification, and professional development. To better understand teacher effectiveness, it is important to have a global viewpoint to truly understand how beliefs and practices vary in each country and can lead to different characterizations of what makes an effective teacher. This includes both cross-cultural commonalities and unique differences in conceptualization of teacher effectiveness and practices. With this comprehensive, international understanding of teacher effectiveness, a better understanding of best practices, teacher models, philosophies, and more will be developed. International Beliefs and Practices That Characterize Teacher Effectiveness identifies, shares, and explores the predominant conceptual understandings of beliefs and practices that characterize effective teachers in different countries. This book provides international and cross-cultural perspectives on teacher effectiveness and examines the prominent philosophies of teaching and pedagogical practices that characterize teachers in selected countries. Each chapter includes a background, such as history and undergirding philosophy within each country, effective teacher models, prominent applications of teacher effectiveness practices, and special or unique features of teaching in the specific countries mentioned. This book is essential for practicing educators in various countries, teacher educators, faculty, and students within schools and colleges, researchers in international comparative studies, organizations engaged in international education, and administrators, practitioners, and academicians interested in how teacher effectiveness is characterized in different countries and regions across the world.

Close Air Support May 12 2021

Integrative Oncology Aug 22 2019 More and more people living with and beyond cancer seek integrative interventions to complement their conventional cancer care. This second edition of the highly successful *Integrative Oncology* provides the reader with the most updated information available with new chapters on Music and Expressive Arts Therapies, Naturopathic Oncology, and an integrative approach to Lung Cancer. Integrative medicine is defined as healing-oriented medicine that takes account of the whole person (body, mind, and spirit) as well as all aspects of lifestyle; it emphasizes the therapeutic relationship and makes use of appropriate therapies, both conventional and alternative. This series grows out of a need to organize and make accessible to clinicians the basic principles of integrative medicine in practical application to common health conditions. Each volume focuses on a particular specialty and features well-recognized and authoritative editors and chapter authors. The text is presented in an easy-to-read format featuring case histories, clinical pearls, and useful tables, with all key information highlighted. Series editor Andrew Weil, MD, is Professor and Director of the Arizona Center for Integrative Medicine at the University of Arizona. Dr. Weil's program was the first such academic program in the U.S., and its stated goal is "to combine the best ideas and practices of conventional and alternative medicine into cost effective treatments without embracing alternative practices uncritically."

Effectiveness of Total Quality Management in Education Jun 24 2022 The high rate of dropping out of school among high school students and high rate of failing the national test in many countries endanger the future of hundreds of thousands of youth all over the world. Poverty, social violence and political instability are major outcomes of this epidemic. This problem persists to exist despite the continuous injection of billions of the tax money by many governments in efforts to reform and develop their educational systems. Lack of students' motivation, beside other reasons, is a major cause that makes many of the students tend to drop out of their schools and fail to graduate at the High school level. The researcher believed that this problem could be solved by application of Total Quality Management (TQM) in school. Application of TQM will help create a conducive environment for teaching and learning and lead to motivate the students and enable them to learn to their optimal capacity and become high achievers in their lives. The result of this research showed that Application of TQM in the school management is very effective on students' motivation.

An Ethical Modernity? Apr 30 2020 *An Ethical Modernity?* offers a new view of Hegel's doctrine of ethical life (Sittlichkeit) in relation to modernity. In this collection of essays, the authors investigate various aspects of this relation and its importance for today's world.

The Effectiveness of the Part and the Whole Methods of Study Sep 27 2022

Teacher Professional Development for Improving Quality of Teaching Jun 12 2021 This book makes a major contribution to knowledge and theory by drawing implications of teacher effectiveness research for the field of teacher training and professional development. The first part of the book provides a critical review of research on teacher training and professional development and illustrates the limitations of the main approaches to teacher development such as the competence-based and the holistic approach. A dynamic perspective to policy and practice in teacher training and professional development is advocated. The second part of the book provides a critical review of research on teacher effectiveness. The main phases of this field of research are analysed. It is pointed out that teacher factors are presented as being in opposition to one another. An integrated approach in defining quality of teaching is adopted. The importance of taking into account findings of studies investigating differential teacher effectiveness is argued. Another significant limitation of this field of research is that the whole process of searching for teacher effectiveness factor was not able to have a significant impact upon teacher training and professional development. For this reason it is advocated that teacher training and professional development should be focused on how to address grouping of specific teacher factors associated with student learning and on how to help teachers improve their teaching skills by moving from using skills associated with direct teaching only to more advanced skills concerned with new teaching approaches and differentiation of teaching. The book refers to studies conducted in different countries illustrating how the proposed approach can be used by policy and practice in teacher education. Specifically, the book provides evidence supporting the validity of the theoretical framework upon which this approach is based. Moreover, experimental and longitudinal studies supporting the use of this approach for improvement purposes are presented and suggestions for further research utilising and expanding the Dynamic Approach for teacher training and professional development are provided.

Maritime Logistics Nov 05 2020 Sea freight remains overwhelmingly the most common form of transport for goods globally. Grasp the core theories and understand the latest research in maritime logistics, along with how this field operates and contributes to global supply chains, with this key textbook. *Maritime Logistics* provides a complete overview of the core concepts within this discipline from a range of international expert contributors. This textbook examines the recent developments in the ports and shipping industries including supply chain strategies and emerging, innovative practices. Designed for maritime students and professionals, the structure offers a complete approach with an emphasis on developing a well-rounded knowledge and understanding of the field. The third edition is fully updated with new content on maintenance optimization, supply chain integration, economies of scale within liner shipping and port performance and management. In addition, this edition examines new technologies, considers new and existing risks to the maritime supply chain as well as generally how maritime logistics will continue to evolve. For those seeking to become maritime logistics specialists, this is the authoritative companion.

Higher Education Cannot Escape History Jul 02 2020 As we approach the end of the twentieth century and enter the twenty-first, the nation's system of colleges and universities, as well as higher education around the world, will face some enduring conflicts and contradictions—the basic challenges that must be confronted and solved again and again in every generation. These include nationalization versus internationalization in higher education, merit in academic pursuits versus equality of treatment, the preservation of the past versus improvement of the present or changes in the future, differentiation of functions among higher education institutions versus their homogenization in a world of mass access, and commitment to ethical conduct in the pursuit and dissemination of knowledge versus exploitation of the process for individual gain. This book outlines possible solutions to these dilemmas that will enable higher education to continue to serve its own imperatives as well as contribute to the quality of life around the world in the coming years and decades.

Influencing Organizational Effectiveness May 24 2022 In this book Linda Holbeche offers a historical narrative on the changing landscape of work since the 1980s and considers how definitions of organizational effectiveness have changed over time. She considers the characteristics and effects of the neo-liberal work culture of new capitalism, and how HRM practices have contributed to shaping this work culture. *Influencing Organizational Effectiveness* challenges mainstream thinking around business strategy, change and organizational effectiveness, and about the roles of HRM and management. While the overall tone of the book is critical, Holbeche argues that HRM can play an active role in giving voice to employees and advancing organizational effectiveness. Grounded in research, this book includes reflective questions, case studies and helpful guidelines to support HRM and organizational development professionals and master's-level students. It illustrates what 'better' might look like and how HRM can contribute to a new definition of effectiveness which is aligned to the needs of modern organizations.

Poultry Science Oct 05 2020 Vol. 5 includes a separately paged special issue, dated June 1926.

Effectiveness and Reform of the United Nations Development Programme (UNDP) Aug 15 2021 The United Nations' development co-operation has often been criticized in the past; many shortcomings can indeed be identified. However, efforts to overcome the existing problems have been stepped up. A key role in the reform of the UN in this area is played by the United Nations Development Programme (UNDP). This study is intended as a constructive contribution to the current debate on the reform of UN development co-operation. It analyses both the main weaknesses of UN development co-operation as a whole and the reforms that have so far been undertaken. On this basis it identifies the areas in which further efforts are needed if the UNDP is to become more effective.

Cancer Care for the Whole Patient Oct 17 2021 Cancer care today often provides state-of-the-science biomedical treatment, but fails to address the psychological and social (psychosocial) problems associated with the illness. This failure can compromise the effectiveness of health care and thereby adversely affect the health of cancer patients. Psychological and social problems created or exacerbated by cancer-including depression and other emotional problems; lack of information or skills needed to manage the illness; lack of transportation or other resources; and disruptions in work, school, and family life-cause additional suffering, weaken adherence to prescribed treatments, and threaten patients' return to health. Today, it is not possible to deliver high-quality cancer care without using existing approaches, tools, and resources to address patients' psychosocial health needs. All patients with cancer and their families should expect and receive cancer care that ensures the provision of appropriate psychosocial health services. Cancer Care for the Whole Patient recommends actions that oncology providers, health policy makers, educators, health insurers, health planners, researchers and research sponsors, and consumer advocates should undertake to ensure that this standard is met.
