Most new parents quickly and sadly discover the difficulty of getting a child first to go to sleep, and then to sleep throughout the night. Dr. Fleiss, a noted family pediatrician for more than 30 years, shares his secrets for discovering a child's natural sleep patterns, developing positive bedtime rituals, nutritional and lifestyle aids to sleep, and how co-sleeping affects normal growth and development. Raising a child with ADHD can be distressing and exhausting for the whole family. But given the appropriate knowledge, and the right tools, parents can intervene to manage their child's behaviour, leading to improved relationships at home and, it is hoped, a more successful time at school. This simple, flexible six-step programme is full of tried-and-tested ideas for parents and professionals supporting families of young children with ADHD. By practicing the techniques and strategies, parents will gain confidence in their parenting and, over time, will improve the child's management of the condition. The programme includes games that will help improve the child's attention, exercises to develop patience and tips for supporting the child in successful self-organization. There are also plenty of useful ideas for developing communication between parents and schools. Based on research and extensive clinical experience, *Step by Step Help for Children with ADHD* will help families to adapt their parenting to the child, improving relationships and behaviours in the home and at play group. In a world where parenting advice shifts faster than fashion trends, this "how not-to parent" resource takes a fresh look at how the Seven Deadly Sins are the root of most modern parenting problems. Through humorous stories and practical biblical wisdom, Patrick Quinn and Ken Roach show how well-meaning parents can ruin their children's lives in seven easy steps (wrath, greed, envy, lust, sloth, gluttony, and pride). Quinn and Roach then offer a fresh counter-approach—laying a seven-fold foundation for lasting significance so parents can help rescue their children's heart ... and future. Observation of young children, their development, and planning for next steps is a fundamental requirement of early years practice. Awareness of appropriate techniques, understanding what you are observing, as well as what it all means in terms of planning for learning is an essential yet difficult skill to acquire. This is a very practical book on observing young children that supports you in preparing a child observation case study. Taking a step-by-step approach the book covers the whole process beginning with choosing a child to study before discussing the fundamentals of child observation. It includes invaluable guidance on: The ethics of your study Appropriate techniques and tools for gathering data Observations that are useful How to select material to include Analyzing or interpreting the information Potential pitfalls The book includes many examples of good observations, which help show how your own observations can be evaluated, analyzed and used. In addition there is a fully worked example of a child observation case study in the penultimate chapter. If you are studying early years or early childhood studies at foundation, undergraduate or Master's degree level then this book will really help you get to grips with how a good child observation study unfolds and develops. Cath Arnold works at the Pen Green Centre, an internationally renowned Children's Centre in Corby, UK. She is author of *Observing Harry* (Open University Press 2003). This is a fascinating and accessible new book on child observation case study for students and professionals. Cath Arnold integrates theoretical perspectives and practical examples of observations with remarkable clarity in this comprehensive guidance to child case study. Shirley Allen, Senior Lecturer Early Childhood Studies, Middlesex University It is quickly evident to the reader that 'Doing Your Child Observation Case Study' is steeped in the expertise and extensive experience of its author. The practical guidance it offers is likely to prove invaluable for childhood studies students and early career researchers in the field. Yet Cath Arnold's 'step-by-step guide' goes far beyond the practical. She shines vital light on the complex nuances of values, beliefs, ethics and rights inherent in child case study and addresses with clarity and credibility the crucial role that theory can play in supporting our understanding of children's actions. This text is an excellent addition to the childhood studies bookshelf. Dr Jane Murray, Centre for Education and Research, University of Northampton, UK Cath Arnold has provided a rich resource for those who want to understand more about children, their wellbeing and their learning. This detailed approach to child observation offers guidance on why, how and what to observe, and how to interpret what is observed. Rich in examples collected over many years 'Doing your Child Observation Case Study' will get many early years practitioners started on their own learning journeys as they watch and engage with young children to develop detailed impressions of children's development. Professor Cathy Nutbrown, Head of The School of Education, The University of Sheffield In this new book Cath is once more supporting early childhood educators to engage in the strong UK tradition of child observations; the tradition of Piaget, Novara, Darwin and Susan Isaacs. She has developed her own understanding of the importance of observational studies building on the giants whose shoulders we all stand on. This powerful publication combines insights into both the theory and practice of developing child observations in an early years setting. Cath demonstrates how detailed and powerful records of children's learning and development speak to practitioners and hold their value over time in a world where early educators are increasingly obliged to devote enormous amounts of their energy filling in forms, schedules and are hard pressed to reject the pressure of tick box developmental checks and imposed tracking schemes. This book lights the way to a much deeper way of documenting children's learning and development. As educators we need to match children's learning with rich curriculum content and this book reminds us that we can only achieve this critical pedagogical task if we have closely watched what it is that excites and interests each individual child. 'Doing Your Child Observation Case Study' shows us the way to be well informed practitioners able to offer children a really rich learning experience. Dr. Margy Whalley, Director of the Research, Development and Training Base at the Pen Green Centre and Centre for Children and their Families Nearly three hundred learning tasks, arranged sequentially within the areas of fine motor ability, self-care, language development, gross motor skills, and perceptual ability, are detailed to assist parents, teachers, and paraprofessionals in teaching sch Most children are afraid of the dark. Some fear monsters under the bed. But 10 percent of children have excessive fears and worries - phobias, separation anxiety, panic attacks, social anxiety, or obsessive-compulsive disorder - that can hold them back and keep them from fully enjoying childhood. If your child suffers from any of these forms of anxiety, the program in this book offers practical, scientifically proven tools that can help. Now in its second edition, *Helping Your Anxious Child* has been expanded and updated to include the latest research and techniques for managing child anxiety. You'll learn how to help your child overcome intense fears and worries and find out how to relieve anxious feelings while parenting with compassion. Help your child practice "detective thinking" to recognize irrational worries What to do when your child becomes frightened How to gently and gradually expose your child to challenging situations Help your child learn important social skills. View our feature on Joel Haber's *Bullyproof Your Child For Life*. As featured in the New York Times-an expert's proven technique for stamping out bullying. "Bully Coach" Joel Haber, Ph.D., is one of the foremost experts in the prevention of bullying. A pioneer in the field, he has worked with thousands of kids, parents, teachers, counselors, and others to understand the root causes of the bullying dynamic-from identifying bully types to exposing the reasons why kids become bullies, targets, or bystanders-and stamp it out once and for all. Delivering a practical, supportive, and step-by-step "bullyproofing prescription" that yields lasting results for both boys and girls, from grade school through high school, *Bullyproof Your Child for Life* offers specific action steps to help any child build resilience and confidence, develop compassion and trust, and thrive in school, camp, sports, and beyond. Empowering, instructive, and inspiring, this muchneeded guide will help parents detect the early signs of bullying and intervene-with lasting results. First published in 1920, this book contains fantastic guide to teaching piano playing for music teachers, written by Tobias Matthay. Tobias Augustus Matthay (1858 – 1945) was an English pianist, composer, and teacher. He was taught composition while at the Royal Academy of Music by Arthur Sullivan and Sir William Sterndale Bennett, and he was instructed in the piano by William Dorrell and Walter Macfarren. Contents include: "Method in its Good and Its Bad Sense", "Fad-Methods to be Avoided", "Method in its Helpful Sense", "Cramming v. Teaching", "Method v. Teaching Devices", "Example of Method in Teaching, Fore-am Rotation", "Repetition of Formulae Useless, Knowledge of Facts Essential", etc. This timeless handbook will be of considerable utility to piano teachers and students alike, and it would make for a worthy addition to allied collections. Other notable works by this author include: "The Act Of Touch In All Its Diversity" (1903), "The First Principles of Pianoforte Playing (1905)" and "Relaxation Studies" (1908). Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new biography of the author. Are you a parent of a strong-willed child? What can you do when your children don't listen? Are you looking for a discipline without yelling? Parenting is the most important jobs in the world. Becoming proactive parent by scrolling up and clicking the BUY NOW BUTTON at the top of this page. Every parent wants the best for their child. To see them flourish and succeed in their future. All great accomplishments that your child has and will do come down to you. In this book, you have the opportunity to journey through seven-steps that will lead to a smarter child. It starts with developing the right attitude and knowing what you can do as a parent, in order to assist in the academic well being of your child. Is tough love the answer? What kinds of routines should you implement at home? And finally, what experiences are the most vital for your child to have? What you do at home is a direct correlation of what your child does at school. And what your child does at school is a direct correlation of what their future holds. Author Diana Bennett uniquely parallels a child's behaviour at home, with what it looks like in a classroom setting, and by following her guide you can improve both home and school life. Within these pages are the answers to every parent's question of how to make their child smarter. Created by a parent in consultation with 23 health and education professionals, this guide is packed with family-tested tips and techniques that make a tough job--raising children with behavioral health problems--easier. Does your child love princesses, princes, castles, dragons, unicorns, and other fairy tale characters? If your daughter or son love everything that has to do with princesses and their kingdoms, then look no further than this book filled with cute cartoon princesses and fairy tale characters to draw. This book will teach your child how to draw princesses and other princess stuff, step by step, with the easiest approach possible...by using alphabet letters, numbers, symbols, and other simple shapes. This is letter and number fun at its best! Kids and beginners will learn how to draw cute dragons, unicorns, princesses, princes, a horse and coach, a king, a queen, castles, dragons, and unicorns. Rachel has been teaching kids how to draw for almost ten years now, and this drawing technique really works! With this no-tears strategy, learning how to draw is fun for children as young as 6 years old, but also works for adults and teens. Cartooning is fun for kids, but even more fun when it comes easy to them. This book does just that...makes drawing fun and easy for kids. This book will turn your child into the princess drawing artist that he or she wants to be. Each cute drawing lesson is a step by step process. Each tutorial is broken down into the simplest of steps that can be followed by most children. Your child doesn't need to know how to read or write letters to follow these drawing lessons. In fact, preschoolers, Kindergartners, First graders, etc. can enjoy this book. The only thing your child needs is time and interest. You can also use this as a drawing workbook as the child can draw along in the book. This book is for both boys and girls, and is good for kids of most age ranges, but is best for kids aged 6-8, 9-12 - but if your kids are 6, 7, 8, 9, 10, 11, 12, 13, 14, 15, 16, etc, they will all have fun trying these drawing tutorials out. Have fun drawing the day away! Let the princess / fairy tale drawing and doodling start now! Great for kids and beginners! Are your kids struggling with music theory? Is your child an extremely picky eater? Do you worry that he or she might not be getting the nutrients they need? In *Helping Your Child with Extreme Picky Eating*, a family doctor offers a clinically proven program to help you support healthy and balanced eating habits in your child, maintain their healthy weight, and end meal-time anxiety once and for all. Having a child with extreme picky eating habits can be both frustrating and worrisome! Especially if you are concerned your child isn't getting the nutrition they need to grow, stay healthy and strong, and thrive. And if your child has a feeding or selective eating disorder (SED), they may simply refuse to eat a number of foods altogether. To make matters worse, children with feeding disorders often experience anxiety, anger, and may be suspicious or untrusting of adults who pressure, trick, and even force them to eat. This book provides a clinically proven program called STEPS (Supportive Treatment of Eating in Preschoolers) that will help you get your child's feeding disorder or SED under control. In addition, you'll find a number of practical strategies you can use for dealing with food aversion, low appetite, sensory challenges, autism spectrum-related food disorders, super-tasters, oral motor delay, acid reflux, and food allergies. If your child has a feeding or selective eating disorder, you need powerful solutions you can use right now. This book will prove an invaluable guide to help restore peace to your dinner table. Enables you to reduce the stress of studying science and help your children with their homework. This title covers the important areas of biology, chemistry and physics. The fifth edition of *Healthy Sleep Habits, Happy Child* gives parents proven strategies to ensure healthy, high-quality sleep for children at every age. Parenthood can be the most pleasurable and worthwhile task in the world. But how can we be sure we are doing it right? 'Understanding Your Child' is an A-Z guide to the psychology of parenting. It covers over 175 key topics, from adolescence and working mums to thumbsucking, dyslexia and discipline, in an easily accessible and reassuring way. Also included are overviews of the important issues for each developmental stage: birth to six months, six months to a year, one to three years, three to six, six to twelve, twelve to sixteen and over. Many early years students and practitioners can struggle with how to observe children, knowing what makes good observations, as well as how to use them and why they matter so much. This is a very practical 'how to' book on observing young children and preparing a child case study, with helpful guidance on how to go about this, including where and how to begin and proceed; appropriate techniques and related processes as well as possible pitfalls. In addition the book includes examples of good observations which show how your observation can be evaluated, analysed and used. The book covers the whole process of embarking on the study or observation of a child (or children) including sensitive areas or areas to avoid. It begins with choosing a child to study; the ethics of the study; ways of gathering data and tools to use; observations that are useful; examples of short child case studies and longer child case studies; how to select material to include; and, analysing or interpreting the material. One child (Georgia) is used as a focus example throughout the book so that you can really get to grips with how a good child observation study unfolds and develops. Further shorter examples also illuminate the challenges and practicalities of doing your child observation case study. Based on a parenting program developed by Penelope Shore for the Pentagon, this reader-friendly guide is designed for busy new parents seeking critical information about raising children from newborn to age 3. Full-color illustrations. Recognising, expressing and understanding emotions helps young children make sense of their life experiences. Children diagnosed with autism can have significant difficulties with

recognising and processing emotions which can lead to high levels of anxiety as they struggle to make sense of the unpredictable world around them. The 'Fun with Feelings' programme is designed to help parents support their children with emotional regulation and to decrease anxiety. This guide is structured around 10 stages. The initial four stages prepare parents to implement the programme with their child. These stages help parents understand the causes of anxiety and provide practical strategies for creating a toolbox to reduce anxiety. The final six stages are used in conjunction with Having Fun with Feelings on the Autism Spectrum: A CBT Activity Book for Kids Age 4-8, allowing parents to support their child while working through the activity book. Written by world-leading experts in the field, 10 Steps to Reducing Your Child's Anxiety on the Autism Spectrum provides the steppingstones for parents of young children with autism to better understand their child's emotional skill set and empower them to understand and articulate their feelings. Caroline Archer sets out to provide adoptive and foster parents with an understanding of the complex range of difficulties with which their children may struggle as a result of their early experience of adversity. She presents strategies to help parents deal with their youngsters' troubling behaviour, in what seems to them a hostile world. Do you want a step by step detailed plan to have your toddler potty trained in a while: no more dirty diapers at all? If yes, then keep reading... Potty training your child or toddler can be an intimidating situation, but it shouldn't be that way. It's natural to second-guess yourself and all the efforts you put into helping out your child. The good thing is that you are definitely not alone in this. While there is a myriad of tips out there to guide you, potty training isn't a one-size-fits-all kind of thing. It all boils down to the unique little individual that you are trying to potty train. Nonetheless, potty training is critical as it protects babies against diseases such as urinary tract infections and diaper rash. The best way to approach potty training is to see it as an adventure. Yep, that's right. This messy, confusing, and chaotic duty is a beautiful transition, rather than an inconvenience. As an adult, you will be the source of help and comfort. No matter how difficult it is for you to train them, just imagine how confusing and overwhelming it is for them. Freedom and independence are huge milestones, and all developmental milestones need your loving support. Getting your child on the right track for potty training success starts with YOU! The more you prepare, the better equipped you will be to help your little one quickly and easily succeed in your potty-training adventure together. Whether you are just starting to research how to begin, are ready to start tomorrow, or have been trying with little success, this book will provide you with fun strategies, tips, tricks, troubleshooting advice to significantly reduce the amount of time it takes to get your child on board with going to the potty consistently and without added stress from crazy schedules or spending endless hours in the bathroom. Imagine learning to dance the tango with no prior experience. You would need the right stuff, the right clothes, the right shoes, and of course, the most supportive dance teacher to help you out. In potty training, the excitement of buying the right gear should be an exciting time for your toddler. The pleasure of owning new things will allow them to set aside the fear and anxiety they harbor.
