The School Bus? According to Dr. Keshia L. Gaines, students should learn from academic content on the school bus and other unique learning areas (the bus stop, cafeteria, playgrounds, bathrooms, academic clothing, etc.). The key to improving America's educational system, Gaines believes, is to allow students to learn outside the classroom. Since students are not meeting academic expectations in the general classroom, it is important to consider all methods and areas for students to learn. Dr. Gaines founded Bus-stop 2 Bus-stop, LLC and created the Bus-stop 2 Bus-stop(TM) learning method to help students increase academic achievement in fun, innovative ways. The idea behind the Bus-stop 2 Bus-stop(TM) learning method is that students will be exposed to academic content starting at the school bus stop. Students will continue to be exposed to academic content throughout their school hours until they get dropped off at that same bus stop at the end of the school day. This book is designed for use in various education courses, educational leadership positions, and for general reading by anyone who is worried about the future of our children and educational systems. For entry-level students in education, this book provides insight and new

ways to improve academic achievement in America. This book is also appropriate for various upper-level courses because of its research components, references, discussion questions, and journal activities. The purpose of this book is to explain the Bus-stop 2 Bus-stop(TM) learning method and to ultimately improve the current educational system in America. A fundamental resource for both current and prospective school administrators, school treasurers, and boards of education, this guidebook offers in-depth coverage of how the school funding process works currently and how this process may be improved. She took us all the way to Hawaii, where we waded through lava and saw a real volcano blow its top. We had a great time -- even though the trip was sometimes almost

too hot to handle! One thing's for sure: This was one explosive adventure that none of us will ever forget!" -- Back cover. A special field trip on the magic school bus allows Ms. Frizzle's class to get a first-hand look at major parts of the body and how they work. When Dorothy Ann and the other kids in Ms. Frizzle's class go in search of the kookaburra, they end up in Australia, where they encounter a herd of kangaroo and a Tasmanian devil. The class decides to plant a garden and Ms. Frizzle takes them on a field trip, where they learn about the cycle of plant life. Ms. Frizzle takes her students all over the country looking for bats, and in the process the students learn all about these flying mammals. Ch. 1 Introduction -- Ch. 2.
