A study of the impact of corporate middle-level managers and white collar workers on American society and culture. An extended essay on social change based on case studies of a wide range of participants in the emerging corporate culture of the early 1900s. Zunz is in the history department at the U. of Virginia. Annotation copyrighted by Book News, Inc., Portland, OR In an afterword to this new edition, Roediger discusses recent studies of whiteness and the changing face of labor itself. He surveys criticism of his work, accepting many objections whilst challenging

others, especially the view that the study of working class racism implies a rejection of Marxism and radical politics. The history of slavery is central to understanding the history of the United States. Slavery and the Making of America offers a richly illustrated, vividly written history that illuminates the human side of this inhumane institution, presenting it largely through stories of the slaves themselves. Readers will discover a wide ranging and sharply nuanced look at American slavery, from the first Africans brought to British colonies in the early

seventeenth century to the end of Reconstruction. The authors document the horrors of slavery, particularly in the deep South, and describe the valiant struggles to escape bondage, from dramatic tales of slaves such as William and Ellen Craft to Dred Scott's doomed attempt to win his freedom through the Supreme Court. We see how slavery set our nation on the road of violence, from bloody riots that broke out in American cities over fugitive slaves, to the cataclysm of the Civil War. Along the way, readers meet such individuals as "Black Sam" Fraunces, a West

Indian mulatto who owned the Queen's Head Tavern in New York City, a key meeting place for revolutionaries in the 1760s and 1770s and Sergeant William H. Carney, who won the Congressional Medal of Honor for his bravery at the crucial assault on Fort Wagner during the Civil War as well as Benjamin "Pap" Singleton, a former slave who led freed African Americans to a new life on the American frontier. A revelatory look at a momentous undertaking from the workers' point of view The Panama Canal has long been celebrated as a triumph of American engineering and ingenuity. In The

Canal Builders, Julie Greene reveals that this emphasis has obscured a far more remarkable element of the historic enterprise: the tens of thousands of workingmen and workingwomen who traveled from all around the world to build it. Greene looks past the mythology surrounding the canal to expose the difficult working conditions and discriminatory policies involved in its construction. Drawing extensively on letters, memoirs, and government documents, the book chronicles both the struggles and the triumphs of the workers and their families. Prodigiously

researched and vividly told, *The Canal Builders* explores the human dimensions of one of the world's greatest labor mobilizations, and reveals how it launched America's twentieth-century empire. Shaped with a clear political chronology, *MAKING AMERICA* reflects the variety of individual experiences and cultures that comprise American society. The book's clear and helpful presentation speaks directly to students, sparking their curiosity and inviting them to "do history" as well as read about it. For instructors whose classrooms mirror the diversity of today's college

students, the strongly chronological narrative, together with visuals and an integrated program of learning and teaching aids, makes the historical content vivid and comprehensible to students at all levels of preparedness. Donaldson's highly successful textbook *The Making of Modern America*, introduces students to the cultural, social and political paths the United States has traveled from the end of WWII to the present day. In this first of three volumes, Dorrien identifies the indigenous roots of American liberal theology and demonstrates a wider, longer-running tradition than has been thought. The tradition took shape in the nineteenth century, motivated by a desire to map a modernist "third way" between orthodoxy and

rationalistic deism/atheism. It is defined by its openness to modern intellectual inquiry; its commitment to the authority of individual reason and experience; its conception of Christianity as an ethical way of life; and its commitment to make Christianity credible and socially relevant to modern people. Dorrien takes a narrative approach and provides a biographical reading of important religious thinkers of the time, including William E. Channing, Ralph Waldo Emerson, Horace Bushnell, Henry Ward Beecher, Elizabeth Cady Stanton, and Charles Briggs.

Dorrien notes that, although liberal theology moved into elite academic institutions, its conceptual foundations were laid in the pulpit rather than the classroom. A stunningly insightful account of the global political and economic system, sustained first by Britain and now by America, that has created the modern world. The key to the two countries' predominance, Mead argues, lies in the individualistic ideology inherent in the Anglo-American religion. Over the years Britain and America's liberal democratic system has been repeatedly challenged—by Catholic Spain and Louis XIV, the

Nazis, communists, and Al Qaeda—and for the most part, it has prevailed. But the current conflicts in the Middle East threaten to change that record unless we foster a deeper understanding of the conflicts between the liberal world system and its foes. Shaped with a clear political chronology, **MAKING AMERICA** reflects the variety of individual experiences and cultures that comprise American society. A clear, authoritative guide to the crisis of 2008, its continuing repercussions, and the needed reforms ahead. The U.S. economy lost the first decade of the twenty-first century to an ill-conceived boom and subsequent bust. It is in danger of losing another decade to the stagnation of an incomplete recovery. How did this happen? Read this lucid explanation of the origins and long-term effects of the recent financial crisis, drawn in historical and comparative

perspective by two leading political economists. By 2008 the United States had become the biggest international borrower in world history, with more than two-thirds of its \$6 trillion federal debt in foreign hands. The proportion of foreign loans to the size of the economy put the United States in league with Mexico, Indonesia, and other third-world debtor nations. The massive inflow of foreign funds financed the booms in housing prices and consumer spending that fueled the economy until the collapse of late 2008. This was the most serious international economic crisis

since the Great Depression of the 1930s. Menzie Chinn and Jeffrey Frieden explain the political and economic roots of this crisis as well as its long-term effects. They explore the political strategies behind the Bush administration's policy of funding massive deficits with foreign borrowing. They show that the crisis was foreseen by many and was avoidable through appropriate policy measures. They examine the continuing impact of our huge debt on the continuing slow recovery from the recession. Lost Decades will long be regarded as the standard account of the crisis and its

aftermath. "Genau der Schriftsteller, den wir brauchen." Daniel Kehlmann "Leidenschaftlich, verstörend, fesselnd." Salman Rushdie Ayad Akthars "Homeland Elegien" ist ein intelligenter Roman über den zerrütteten Zustand des heutigen Amerikas. Über ein Amerika, in dem die Ideale der amerikanischen Demokratie den Göttern der Finanzindustrie geopfert wurden und eine TV-Persönlichkeit Präsident werden konnte. Es ist ein persönliches Memoir über die Erfahrungen von im Westen lebenden Muslimen, insbesondere nach 9/11, und eine Reflexion über die

Möglichkeit einer westlichen muslimischen Identität. Es ist eine manchmal komische, manchmal bewegende, manchmal konfliktreiche Einwandererfamilie ngeschichte und die intellektuelle Biografie eines künstlerischen Ausnahmetalents. Und nicht zuletzt erzählt der Roman mit großem Esprit und aus ungewohnter Perspektive globale Zeitgeschichte, vom Konflikt zwischen Pakistan und Indien über den ersten Afghanistan Krieg bis hin zu Osama bin Laden und dem islamistischen Terror der jüngsten Gegenwart. Als Michelle mit Mitte zwanzig erfährt,

dass ihre Mutter an Krebs erkrankt ist, steht die Welt für sie still. Sie lässt ihr bisheriges Leben in Philadelphia zurück und kehrt heim nach Oregon, in ihr abgelegenes Elternhaus, um ganz für ihre Mutter da zu sein. Doch schon ein halbes Jahr später stirbt die Mutter. Michelle begegnet ihrer Trauer, ihrer Wut, ihrer Angst mit einer Selbsttherapie: der koreanischen Küche. Sie kocht all die asiatischen Gerichte, die sie früher mit ihrer Mutter a□und erinnert sich dabei an die gemeinsame Zeit: an das Aufwachsen unter den Augen einer strengen und fordernden Mutter; an die quirligen

Sommer in Seoul; an das Gefühl, weder in den USA noch in Korea ganz dazuzugehören. Und an die Körper und Seele wärmenden Gerichte, über denen sie und ihre Mutter immer wieder zusammengefunden haben. This 2005 book explores the evolution of Americans' first way of war, to show how war waged against Indian noncombatant population and agricultural resources became the method early Americans employed and, ultimately, defined their military heritage. The sanguinary story of the American conquest of the Indian peoples east

of the Mississippi River helps demonstrate how early Americans embraced warfare shaped by extravagant violence and focused on conquest. Grenier provides a major revision in understanding the place of warfare directed on noncombatants in the American military tradition, and his conclusions are relevant to understand US 'special operations' in the War on Terror. For Gertrude Stein, *The Making of Americans* was always her masterpiece. A novel of unparalleled scope and encyclopedic ambition, it is a family history that

at once becomes an expose of the possibilities of modern art, language, and psychology. George Moore's study is the first to examine, in its entirety, the novel and its role in the development of Stein's aesthetic. Through a comprehensive analysis of her use of repetition, her theories of art and human character, and her changing relationship to writing itself, Moore argues convincingly for the psychological basis of Stein's theory of language, and the centrality of *The Making of Americans* to the development of Stein's modernism. Strout shows how an American tradition has

developed through the responses of writers to the works of previous writers. He begins with the influence of Tocqueville on American literature, and how his vision brought minimal attention to time and place, and fostered the neglect of southern, black and female writers. Strout demonstrates how writers shed new light on many American themes as they responded to the predecessors. His comparisons cover Hawthorne and Updike; Emerson, Whitman, and William James; Twain and Doctorow; Twain and Faulkner; Lincoln and Jefferson; and Alice Walker and Ralph Ellison. ISBN

For between the 1770s and the 1820s American writing moves on from the ancestral Puritanism of New England and Virginia - though not, as yet, into the American Renaissance so strikingly called for by Ralph Waldo Emerson. Even so, the concourse of voices which arise in this period, that is between (and including) Benjamin Franklin and James Fenimore Cooper, mark both a key transitional literary generation and yet

one all too easily passed over in its own imaginative right. This collection of fifteen specially commissioned essays seeks to establish new bearings, a revision of one of the key political and literary eras in American culture. Not only are Franklin and Cooper themselves carefully re-evaluated in the making of America's new literary republic, but figures like Charles Brockden Brown, Washington Irving, Philip Freneau, William Cullen Bryant, the other Alexander Hamilton, and the playwrights Royall Tyler and William Dunlop. Other essays take a more

inclusive perspective, whether American epistolary fiction, a first generation of American women-authored fiction, the public discourse of *The Federalist Papers*, the rise of the American periodical, or the founding African-American generation of Phillis Wheatley. What unites all the essays is the common assumption that the making of America was as much a matter of creating its national literature; as the making of American literature was a matter of shaping a national identity. An overview of the state of manufacturing in America—both past and present—and how this sector and

the jobs it creates are essential to the American economy “There's no author whose books I look forward to more than Vaclav Smil.” —Bill Gates In *Made in the USA*, Vaclav Smil powerfully rebuts the notion that manufacturing is a relic of predigital history and that the loss of American manufacturing is a desirable evolutionary step toward a pure service economy. Smil argues that no advanced economy can prosper without a strong, innovative manufacturing sector and the jobs it creates. Smil explains how manufacturing became a fundamental force behind America's economic, strategic,

and social dominance. He describes American manufacturing's rapid rise at the end of the nineteenth century, its consolidation and modernization between the two world wars, its role as an enabler of mass consumption after 1945, and its recent decline. Some economists argue that shipping low-value jobs overseas matters little because the high-value work remains in the United States. But, asks Smil, do we want a society that consists of a small population of workers doing high-value-added work and masses of unemployed? Smil assesses various suggestions for solving America's

manufacturing crisis, including lowering corporate tax rates, promoting research and development, and improving public education. Will America act to preserve and reinvigorate its manufacturing? It is crucial to our social and economic well-being; but, Smil warns, the odds are no better than even. This powerful book argues that white culture in America does not exist apart from black culture. The hallmark of this volume is a sweeping reevaluation of the glory years of American literature--from 1830 to 1930--that shows how white literature and black literature form a single interwoven

tradition. (Harvard Univ. Press) February This work examines what is meant by the terms race and ethnicity and examines why policy makers continue to use them as if they had some scientific standing. It argues that race and ethnicity are socially constructed concepts, not objective, scientifically grounded variables. Beidler seeks to analyze memoirs, novels, experimental works of fiction, plays, poems and oral histories about the Vietnamese conflict in relation to the larger process of cultural mythmaking. He finds that most of them are concerned

with the meaning of the conflict for the American culture as a whole. An award-winning historian's sweeping new interpretation of the African American experience. In this masterful account, Ira Berlin, one of the nation's most distinguished historians, offers a revolutionary-and sure to be controversial-new view of African American history. In *The Making of African America*, Berlin challenges the traditional presentation of a linear, progressive history from slavery to freedom. Instead, he puts forth the idea that four great migrations, between the seventeenth and twenty-first

centuries, lie at the heart of black American culture and its development. With an engrossing, accessible narrative, Berlin traces the transit from Africa to America, Virginia to Alabama, Biloxi to Chicago, Lagos to the Bronx, and in the process finds the essence of black American life. The Making of American Whiteness shows that White supremacy was the guiding principle in the settlement of Virginia, the first colony that made up the United States of America, and for the organization of its civil society. The twentieth century has been popularly seen as "the American Century," a long period in which the United States had amassed the economic resources, the political and military strength, and the moral prestige to assume global leadership.

By century's end, the trajectory of American politics, the sense of ever waxing federal power, and the nation's place in the world seemed less assured. Americans of many stripes came to contest the standard narratives of nation building and international hegemony charted by generations of historians. In this volume, a group of distinguished U.S. historians confronts the teleological view of the inexorable transformation of the United States into a modern nation. The contributors analyze a host of ways in which local places were drawn into a wider polity and culture, while at the same time

revealing how national and international structures and ideas created new kinds of local movements and local energies. Rather than seeing the century as a series of conflicts between liberalism and conservatism, they illustrate the ways in which each of these political forces shaped its efforts over the other's cumulative achievements, accommodating to shifts in government, social mores, and popular culture. They demonstrate that international connections have transformed domestic life in myriad ways and, in turn, that the American presence in the world has

been shaped by its distinctive domestic political culture. Finally, they break down boundaries between the public and private sectors, showcasing the government's role in private life and how private organizations influenced national politics. Revisiting and revising many of the chestnuts of American political history, this volume challenges received wisdom about the twentieth-century American experience. "This outstanding work offers a new description of the evolution of American cinema in the nickelodeon period. . . . With his usual groundbreaking research, Abel demonstrates the

key role Pathé films played in this transformation. . . . Although clearly of crucial importance to film studies and film history, this treatment of the issues of the rise of nationalism within the cinema should make the work of great interest to historians dealing with modern nationalism and its relation to mass media."—Tom Gunning, author of *D. W. Griffith and the Origins of Narrative Film* A radical reinterpretation of early American history from a native point of view In *Masters of Empire*, the historian Michael A. McDonnell reveals the vital role played by the native peoples of the

Great Lakes in the history of North America. Though less well known than the Iroquois or Sioux, the Anishinaabeg, who lived across Lakes Michigan and Huron, were equally influential. *Masters of Empire* charts the story of one group, the Odawa, who settled at the straits between those two lakes, a hub for trade and diplomacy throughout the vast country west of Montreal known as the pays d'en haut. Highlighting the long-standing rivalries and relationships among the great Indian nations of North America, McDonnell shows how Europeans often played only a

minor role in this history, and reminds us that it was native peoples who possessed intricate and far-reaching networks of commerce and kinship. As empire encroached upon their domain, the Anishinaabeg were often the ones doing the exploiting. By dictating terms at trading posts and frontier forts, they played a crucial part in the making of early America. Through vivid depictions--all from a native perspective--of early skirmishes, the French and Indian War, and the American Revolution, *Masters of Empire* overturns our assumptions about colonial America. By calling

attention to the Great Lakes as a crucible of culture and conflict, McDonnell reimagines the landscape of American history. "Native rural Virginian and now Chief technology officer at Microsoft, Kevin Scott, discusses the future of AI and how it can be realistically used to promote growth even as the job landscape shifts"--How is culture made? In a readable style, this book argues that the development of American culture in the twentieth century was the result of a cacophony of influences with a large sociological sweep, from the role of immigrants as a new audience

to the intimate circles of artists who forged connections through neighborhoods, popular pubs, and lovers—heterosexual and homosexual—all contributing to an intellectual ferment that was open to new ideas. Patricia Bradley examines how some of these forces impacted the evolution of popular cultural forms such as vaudeville, song, and early film as well as the emergence of modern art, dance, and literary productions. All of these forms were a product of their times and were fueled by the ambition of artists looking to be part of the American success story.

A social history of music in Los Angeles from the 1880s to 1940, this title ventures into an often neglected period to discover that during America's

Progressive Era, LA was a centre for making music long before it became a major metropolis. The book examines the large-scale historical influences that have molded

the varied human adaptation of the continent's physical topography to its needs over more than 500 years. It presents a synoptic view of myriad historical processes working together or in conflict, and illustrates them through their survival in or disappearance from the everyday landscapes of today.
