The topic of sovereignty is contentious, and one of enduring interest. In a world of ever

increasing economic globalisation, the rise of supranational regulation and the interconnected age of information and communication technology, among many other developments, have challenged the once exclusively held Westphalian model of sovereignty. The distinction between the internal aspect of sovereignty as expressed in terms of ultimate authority in a constitution, and the external aspect involving the relationship between sovereign states has been blurred. This has given rise to contemporary debates that explore the theoretical and practical implications of current challenges to established doctrines. Evidently no book could encompass the entirety of the contemporary debates on sovereignty. This is a book of essays focusing on sovereignty by a team of leading writers contributing domestic, European and international perspectives. The essays have been written at a time of very great testing of the institutional frameworks at every level: domestic, European, international or global. The book illuminates the enduring strength of sovereignty as a foundational concept and the continuing widespread appeal of sovereignty as an idea. Provides an overview of legislation intended to protect animals and covers issues surrounding such legislation. This book explores the various ways in which a neighbour dispute can arise, the remedies available and provides practical guidance to assist practitioners on how best to deal with such disputes, which can often prove to be extremely difficult to resolve. This book critically evaluates the rise of the far-right in Greece, detailing the legal context in which to understand both the emergence of Golden Dawn, the far-right's largest grouping, and the 2020 court decision, in which it was deemed to be a criminal organization. Golden Dawn was a political party which, for years, also functioned as a violent subculture movement, with limited

to no interference by the state. This book sets out the background to its rise in Greece, tracing its development from the post-Junta era. At the same time, the book provides an assessment of the legal framework within which the far-right has operated, and the legal tools available to tackle it - including criminal law, non-discrimination law, the laws governing political parties and the public order framework, and the country's international and European obligations. Golden Dawn functioned as both a political party and violent entity until its leadership and parliamentary members were found guilty of leading and participating in a criminal organization. This book demonstrates that the state of impunity in which Golden Dawn's violent hit squads functioned was both a facilitating factor for its rise, and potentially for its demise, as the group potentially felt untouchable. And its attention to how Greek Law has tackled, and failed to tackle, Golden Dawn offers a timely and more generally useful assessment of how legislation, courts and policies can best challenge the far-right. This book will be of interest to those teaching and studying in law and politics, as well as more others, concerned with the rise of the far right and violent organizations, especially in Europe. According to Alcoholics Anonymous (AA) archivist Nell Wing, early AA members were strongly encouraged to read Thomas Troward's Edinburgh Lectures on Mental Science. In the opening of the 2006 film *The Secret*, introductory remarks credit Troward's philosophy with inspiring the movie and its production. Troward was a past president of the International New Thought Alliance. This book analyses the common law's approach to retroactivity. The central claim is that when a court considers whether to develop or change a common law rule the retroactive effect of doing so should explicitly be considered and, informed by the common law's approach to statutory construction, presumptively be resisted. As a platform for this claim a definition of 'retroactivity' is established and a review of the history of retroactivity in the common law is provided. It is then argued that certainty, particularly in the form of an ability to rely on the law, and a conception of negative liberty, constitute rationales for a general presumption

against retroactivity at a level of abstraction applicable both to the construction of statutes and to developing or changing common law rules. The presumption against retroactivity in the construction of statutes is analysed, and one conclusion reached is that the presumption is a principle of the common law independent of legislative intent. Across private, public and criminal law, the retroactive effect of judicial decisions that develop or change common law rules is then considered in detail. 'Prospective overruling' is examined as a potential means to control the retroactive effect of some judicial decisions, but it is argued that prospective overruling should be regarded as constitutionally impermissible. The book is primarily concerned with English and Australian law, although cases from other common law jurisdictions, particularly Canada and New Zealand, are also discussed. The conclusion is that in statutory construction and the adjudication of common law rules there should be a consistently strong presumption against retroactivity, motivated by the common law's concern for certainty and liberty, and defeasible only to strong reasons. 'Ben Juratowitch not only gives an account of the operation of the presumption, but also teases out the policies which underlie the different rules. This is particularly welcome. Lawyers and judges often seem less than sure-footed when confronted by questions in this field. By giving us an insight into the policies, the author provides a basis for more satisfactory decision-making in the future. ...The author not only discusses the recent cases but examines the question in the light of authority in other Commonwealth jurisdictions and with due regard to the more theoretical literature. This is a valuable contribution to what is an important current debate in the law. Happily, Ben Juratowitch has succeeded in making his study not only useful, but interesting and enjoyable.' From the Foreword by Lord Rodger of Earlsferry

A practical guide to helping today's Catholic school teachers deal with the legal issues facing them. *Women, Business and the Law 2022* is the eighth in a series of annual studies measuring progress toward gender equality in 190 economies by examining the laws and regulations that affect women's economic opportunity. The project presents eight

indicators structured around women's interactions with the law as they move through their lives and careers: Mobility, Workplace, Pay, Marriage, Parenthood, Entrepreneurship, Assets, and Pension. This year, the study also includes preliminary findings and analysis of pilot data collected on the provision of childcare and the operation of laws in practice. Examining the economic decisions women make throughout their working lives, as well as progress toward gender equality over the last 50 years, the study is meant to inform research and policy discussions about the state of women's inclusion. By presenting powerful examples of change and highlighting the gaps still remaining, *Women, Business and the Law 2022* is a vital tool in the work of ensuring economic empowerment for all. The data are current as of October 1, 2021.

**About the Book:** This textbook is designed to inspire debate and discussion about the past, present, and future of the music industry--blending insights from legal, business, and policy perspectives. Students are introduced to the history of music as property in commerce; key technological and business milestones affecting all aspects of the creative process; legal protections for those who create music, those who own it, and those who want to use it; the competing (and recurring) policy debates from the past century that have influenced the way creative participants interact with one another; and the challenges and opportunities presented by the digital age.

**About the Authors:** Julie Ross has been a full-time faculty member at Georgetown Law since 1998, where she has taught courses focusing on legal practice and music law. Her scholarship focuses on music copyright and writing pedagogy. She is a graduate of Hamilton College and Harvard Law School and clerked for the Honorable H. Lee Sarokin in New Jersey. Before moving to academia, she practiced as a litigator in Los Angeles. Michael Huppe is President & CEO of SoundExchange, an organization at the center of many legal, policy and technology issues confronting the modern music industry. With over 20 years in the industry, he has fought on behalf of artists, songwriters, labels, publishers, and studio producers. A graduate of Harvard Law School, he was originally a commercial litigator and now focuses on the business issues

affecting creators, especially those relating to music and technology. Der Band bietet eine Einführung in die Rechtssoziologie und die interdisziplinäre Rechtsforschung, die sich im Anschluss an die Socio-legal Studies und die Law and Society-Forschung im angelsächsischen Raum auch im deutschsprachigen Raum herausbildet. Die 16 Beiträge erschließen in exemplarischer Weise die theoretischen, methodischen und inhaltlichen Grundlinien der Beforschung von Recht in den verschiedenen wissenschaftlichen Disziplinen - darunter z.B. Soziologie, Politikwissenschaft, Rechtswissenschaft, Kriminologie, Ethnologie und Philosophie. Sie geben den LeserInnen einerseits einen fundierten Überblick im Sinne einer Bestandsaufnahme. Andererseits werden zentrale Fragestellungen zukünftiger Forschungen und damit Perspektiven des Feldes skizziert. Neben den theoretischen und methodischen Grundlagen der Rechtsforschung entsteht so anhand von beispielhaften Forschungsfragen ein multiperspektivisches Bild der wissenschaftlichen Befassung mit Recht als sozialem Phänomen in den verschiedenen Disziplinen. Der Schwerpunkt liegt dabei auf empirischen, zeitgenössischen und gesellschaftswissenschaftlichen Fragestellungen in den Bereichen „Funktion, Genese und Wirkung Recht“, „Anwendung und Durchsetzung von Recht“ sowie „Wandel von Recht“. Hierin zeigt sich der Charakter der interdisziplinären Rechtsforschung als einer Grundlagendisziplin, die auf eine lange Forschungstradition in Rechtssoziologie, Rechtstatsachenforschung und Rechtswirkungsforschung aufbaut. Die HerausgeberInnen Dr. Christian Boulanger ist Wissenschaftlicher Mitarbeiter an der Humboldt-Universität zu Berlin. Dr. Julika Rosenstock ist Wissenschaftliche Angestellte der Hamburger Stiftung zur Förderung von Wissenschaft und Kultur. Prof. Dr. Tobias Singelnstein lehrt an der Ruhr-Universität Bochum. *Teachers and the Law* uses a unique question and answer format. With the use of engaging and accessible language, the text provides a comprehensive overview of the topics future educators need to know in order to be legally literate and to practice preventative law. The text focuses on legal issues such as sexual harassment, freedom of speech, in-school

prayer, rights of homosexual students, child abuse and neglect, affirmative action, home schooling, defamation, and due process---all topics that reflect current trends essential to the success of educators in the 21st century. In addition to these issues, the text analyzes the major laws affecting education today such as the No Child Left Behind Act of 2001 (NCLB), Title IX, the Family Educational Rights and Privacy Act (FERPA), The Individuals with Disabilities Education Act (IDEA), and certain copyright laws that apply to classroom and distance learning.

*Farming and the Law* is the first publication in Ireland, in over a decade, dealing specifically with legal issues that arise in farming. It offers a comprehensive overview of the legal issues of which farmers should be aware, in an increasingly complex and regulated environment. This book serves to demystify and decipher the often incomprehensible jargon associated with the law as it relates to farming. Irish farming has changed significantly over the years, and it continues to evolve. In a short space of time, it has become more bureaucratic and regulated. Specialist knowledge is required to fully appreciate the problems that farmers face today, as many decisions carry legal, tax, and practical implications. Farmers and landowners who keep abreast of current laws and regulations will be empowered to make better decisions for their farming business. This book is designed to be accessible to the layperson, including farmers, members of the public, and anyone interested in the law in relation to farming. It also will provide an invaluable reference for legal practitioners advising clients in this particular area of law.

This book examines how movements from below pose challenges to the status quo. The 2010s have seen an explosion of protest movements, sometimes characterised as riots by governments and the media. But these are not new phenomena, rather reflecting thousands of years of conflict between different social classes. Beginning with struggles for democracy and control of the state in Athens and ancient Rome, this book traces the common threads of resistance through the Middle Ages in Europe and into the modern age. As classes change so does the composition of the protestors and the

goals of their movements; the one common factor being how groups can mobilise to resist unbearable oppression, thereby developing a crowd consciousness that widens their political horizons and demonstrates the possibility of overthrowing the existing order. To appreciate the roots and motivations of these so-called deviants the author argues that we need to listen to the sound of the crowd. This book will be of interest to researchers of social movements, protests and riots across sociology, history and international relations.

Die ökonomische Analyse des Rechts durchdringt heute sämtliche Rechtsgebiete, vom allgemeinen Zivilrecht über das Wirtschaftsrecht bis hin zu den verfassungsrechtlichen Grundlagen. Vor dem Hintergrund von Europäisierung und Internationalisierung des Rechts beschäftigen sich 59 namhafte Rechtswissenschaftler und Ökonomen aus 15 Ländern mit aktuellen Grundsatzfragen und künftigen Perspektiven der ökonomischen Analyse des Rechts. The interrelationship of law and economics has penetrated several areas of law, including general civil law, business law as well as constitutional law. 59 renowned legal scholars and economists of 15 countries discuss current fundamental issues in law and economics as well as its future perspectives. A special focus is placed on the Europeanisation and the internationalisation of the law. The law is a well-known tool in fighting gender inequality, but which laws actually advance women's rights? This book unpacks the complex nuances behind gender-responsive domestic legislation, from several of the world's leading experts on gender equality. Drawing on domestic examples and international law, it provides a primer of theory alongside tangible and practical solutions to fulfil the promise of the law to deliver equality between men and women. Part I outlines what progress has been made to date on eradicating gender inequality, and insights into the law's potential as one lever in the global struggle for equality. Parts II and III go on to explore concrete areas of law, with case studies from multiple jurisdictions that examine how well domestic legislation is working for women. The authors bring their critical lens to areas of law often considered from a gender perspective - gender-based violence, women's reproductive

health, labour and gender equality quotas - while bringing much-needed analysis to issues often ignored in gender debates, such as taxation, environmental justice and good governance. Part IV seeks to move from a theoretical goal of greater accountability to a practical one. It explores both accountability for international women's rights norms at the domestic level and the potential of feminist approaches to legislation to deliver laws that work for women. Written for students, academics, legislators and policymakers engaged in international women's rights law, gender equality, government accountability and feminist legal theory, this book has tremendous transformative potential to drive forward legal change towards the eradication of gender inequality. This casebook offers law professors and students a doctrinally comprehensive, theoretically ambitious, and up-to-date exploration of the treatment of sexuality and gender in American public law. The Fourth Edition extends the historically grounded first chapter from the Third Edition - establishing the three primary doctrinal strands of liberty, equality, and expression - through the end of the twentieth century. The second chapter focuses on the turning points that now define the field: The post-Roe "undue burden" standard as it has evolved from *Planned Parenthood v. Casey* to *Whole Woman's Health v. Hellerstadt*; The elimination of criminal laws against sexual conduct based on morality in *Lawrence v. Texas* and queries as to the reach of that principle; and The legalization of same-sex marriage in *Obergefell v. Hodges*. Discrimination against women and against trans- and non-binary persons is highlighted throughout the book, from the historical chapter through the most contemporary disputes in workplace and family law. The book's distinctive chapter on the theoretical debates that underlay the field contains more coverage of intersectional and trans-influenced thinking, and a new chapter focuses on the conflict between equality and religious liberty claims, which increasingly dominate in both LGBT and reproductive rights cases. With Professor Courtney Joslin of UC-Davis Law School joining as a new co-author, *Sexuality, Gender, and the Law* continues to provide both the most comprehensive and deepest coverage of this dynamic field. The

European Banking Union and the Role of Law offers a comprehensive and unique examination of the European Banking Union's (EBU) impact on existing legal disciplines and assesses the role of law in shaping the EBU framework. With expert contributions from academics, practitioners and EU officials, this thought-provoking book provides different perspectives on the Single Supervisory Mechanism (SSM) and the Single Resolution Mechanism (SRM). Evaluating and proposing original interpretations on the EBU at a key stage of its development in the European Union, this book assesses topical issues relating to the institutional and administrative rules of the EBU, the interpretation and application of banking law, supervision and resolution frameworks, judicial rules and protection in the EBU. The book is structured into three parts: a general overview of the EBU framework and specific reflections on the both the SSM and the SRM. The contributions show that the EBU is a successful European integration project, yet challenges still lie ahead. This topical and engaging book will be an important reading for practitioners, and public servants in the financial sector. Academics and students of financial law and European law will also find this book a valuable read. *Women and the Law of Property in Early America* A top legal scholar is honored with this commemorative publication. He distinguishes himself through the enormous range of his academic interests and activities as well as through his mediator role between legal theory and practice. The contributions published in this commemorative work reflect the unusual range of Norbert Horn's work. *Adam Smith and the Philosophy of Law and Economics* is a unique book. Malloy and Evensky bring together a team of international and interdisciplinary scholars to address the work of Adam Smith as it relates to law and economics. In addition to their own contributions, the book includes works by Dr. John W. Cairns of the University of Edinburgh, Dr. J. Ralph Lindgren of Lehigh University, Professor Kenneth A.B. Mackinnon of the University of Waikato, and the Honorable Richard A. Posner of the United States Circuit Court of Appeals. Together these authors bring expertise from the areas of law, philosophy, history, economics, and law and economics to a

new study of Adam Smith and his work. Part One of the book presents new and important observations on Smith's views on community, ethics, the court system, criminal law, and delictual or tort law liability. In this part of the book Smith's work is also examined from the perspective of his use as persuasive authority in the works of modern legal economists. In Part Two the 'living Smith' is explored by way of a debate between two major contributors in the field of law and economics. The debate and its analysis create a unique and contemporary opportunity to study Smith as a foundational source in the midst of a current academic and social policy dispute. The understanding of Adam Smith that emerges from this book is new and complex. It will challenge the one-dimensional portrayals of Smith as a promoter of self-interest and it will correct many of the misinterpretations of Smith that are currently fashionable in the worlds of law and economics and the philosophy of law.
