"A group of top scientists, lead by a legendary Nobel Prize winning physicist, has made a discovery so startling and with such deep religious implications that it sends shockwaves through the corridors of power around the world. As the federal government moves to suppress the research, all of those involved vanish without a trace. A mysterious call from the editor of The Washington Post starts Penelope Drayton Spence off in search of the missing scientists. After she crosses paths with enigmatic industrialist Michael Walker, Penelope becomes a fugitive in a wild, hold on tight to the edge of your seat race to expose the truth about the Hermes Project before the government can cover it up."--Publisher's description. DEMON IN THE DARK is his fourth book. His novels vary widely in themes. UNTIL TOMORROW is a Christian mystery, DARING TO LOVE is a romance, and MY PRIZE is a murder mystery. He has a number of active projects for the near future. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. Popular Science gives our readers the information and tools to improve their technology and their world. The core belief that Popular Science and our readers share: The future is going to be better, and science and technology are the driving forces that will help make it better. This 1972 book brings together the results of a decade of research into the physics of liquid metals and alloys, a subject of growing interest to physicists, metallurgists and materials scientists at the time. It covers a wide range of phenomena, and for the benefit of newcomers to the field, Dr Faber provides a clear exposition of the physical properties involved, and the relevant theoretical arguments are developed in sufficient detail for an experimentalist who carries rather little in the way of mathematical equipment to follow them. Experienced researchers will appreciate Dr Faber's critical approach and the many previously unpublished results which he has included. The mass of experimental data which he has brought together and the comprehensive bibliography will make the book of great use to readers of both classes. A trivia quiz book provides little-known facts about the popular television series, including questions and answers about all episodes and characters Since the turn of the 21st century, the television series has rivalled cinema as the paradigmatic filmic medium. Like few other genres, it lends itself to exploring society in its different layers. In the case of Great Britain and Ireland, it functions as a key medium in depicting the state of the nation. Focussing on questions of genre, narrative form, and serialisation, this volume examines the variety of ways in which popular recent British and Irish television series negotiate the concept of community as a key component of the state of the nation. Popular Science gives our readers the information and tools to improve their technology and their world. Chemical Induction of Cancer: Structural Bases and Biological Mechanisms, Volume IIIC: Natural, Metal, Fiber, and Macromolecular Carcinogens covers structure-carcinogenicity relationships of carcinogenic mycotoxins, carcinogenic substances generated by plants, carcinogenic metals and metalloids, and foreign-body carcinogens. The book discusses the metabolism and mechanism of carcinogenic action, physicochemical properties, other biological activities (principally mutagenicity and teratogenicity), modification of carcinogenic activity, formation and environmental significance. The text also describes the carcinogenic water-soluble high polymers and explores the intriguing problems of the carcinogenic effect of osmotic imbalance in tissue microenvironment, as well as of spontaneous malignant transformation occurring in cell cultures in vitro. Studies on tumor induction and carcinogenesis modification by nonviral nucleic acids, by nucleases, proteases, histones, and by antigenic stimulation as well as by antibodies are also considered. The book further tackles tumor-released factors as possible modifiers of carcinogenesis. The text will prove invaluable to chemists and people involved in cancer research. A trio of original science fiction and fantasy short stories. Understanding the modern city and the powerful forces within it is the life's work of Harvard urban economist Edward Glaeser, who at forty is hailed as one of the world's most exciting urban thinkers. Travelling from city to city, speaking to planners and politicians across the world, he uncovers questions large and small whose answers are both counterintuitive and deeply significant. Should New Orleans be rebuilt? Why can't my nephew afford an apartment in New York? Is London the new financial capital of the world? Is my job headed to Bangalore? In Triumph of the City, Glaeser takes us around the world and into the mind of the modern city – from Mumbai to Paris to Rio to Detroit to Shanghai, and to any number of points in between – to reveal how cities think, why they behave in the manners that they do, and what wisdom they share with the people who inhabit them. 'A masterpiece' Steven D. Levitt, co-author of Freakonomics 'A brilliant read: persuasive and provocative' Time Out 'Replete with lightly borne learning, this is a tremendous book' Bryan Appleyard, Literary Review 'Fascinating' Sunday Telegraph 'Comprehensive, compelling and strongly recommended' Tim Harford, author of The Undercover Economist and Adapt 'A hymn to the city' Metro Popular Mechanics inspires, instructs and influences readers to help them master the modern world. Whether it's practical DIY home-improvement tips, gadgets and digital technology, information on the newest cars or the latest breakthroughs in science -- PM is the ultimate guide to our high-tech lifestyle. Ten years ago Stormy Wade survived a mothers worse nightmare, the loss of her only child. Stormy, former policewoman and wife of prominent judge Lyle Wade, discovers fourteen-year-old Melody Streeter, the only eye witness to horrific crimes, is targeted by an underworld assassin. The girl sits defenseless in a jail cell. When there appears to be no other course of action, Stormy, determined to save Melody, springs the girl and the pair become the object of a nation-wide manhunt. Stormy knew her actions would destroy the life she loves, as well as her husbands reputation. But she didnt
