Henry James wrote of Lucy Aikin: "Clever, sagacious, shrewd ... and an accomplished writer, one wonders why her vigorous intellectual temperament has not attracted independent notice." The most important long poem by a woman from the British Romantic era, Aikin's *Epistles on Women* (1810) is the first text in English to re-write the entire history of western culture, from the creation story of Genesis through the eighteenth century, from a feminist perspective. Responding to Alexander Pope's misogynistic "Epistle to a Lady," Aikin argues that men's degradation of women has hindered the growth of civilization, and provides historical and literary evidence for her claim that "man cannot degrade woman without degrading himself." In addition to *Epistles on Women*, this Broadview Edition also

includes a wide selection of poetry, historical writing, fiction, memoir, and literary criticism by Aikin, as well as letters, contemporary reviews, and other feminist historiographies. In the half century before Walter Scott's *Waverley*, dozens of popular novelists produced historical fictions for circulating libraries. This book examines eighty-five popular historical novels published between 1762 and 1813, looking at how the conventions of the genre developed through a process of imitation and experimentation. Excerpt from *The Christian Remembrancer*, Vol. 2: Monthly Magazine and Review; July December, 1841 This is in many respects a remarkable book. It is the genuine product of its author's mind, and exhibits everywhere that unity and distinctness of character which such true parentage can alone bestow. The reader continually feels that he is conversing with a real man; that a living voice is sounding in his ears that he has not wandered into the loose and barren sands of repeated sentiments, which the winds of chance, or the yet drier breath of book-making, have heaped together, but that he is holding converse with a deep and powerful spirit and that the stores of gathered wisdom which are opened to him, (and they are ample,) have been brought together, and are now held in one, by its living and pervading power. So wide, indeed, is the range of expositors from whom Mr. Trench has culled, that the volume may be taken as an historical collection of comments upon the Parables of our Lord by the fathers and best later writers in all languages. Such the unpretending title of *Notes* might lead us to expect to find it. But this is by no means the principal merit of the book. It is as far removed in character as possible from that driest gathering of dry bones, a synopsis *critico rum*; than which, however needful it may be for enriching other soils, there cannot, we hold, be by itself a more utterly arid material. There is exhibited throughout this volume that power of reproduction which can knit together old fragments into the unity and freshness of novelty, without losing the strength and substance of antiquity. The cause of this excellence may be found in the history of the work; the references and quotations have not, as is too often the case, been gathered from indexes and secondhand sources, to make a show of authority for opinions, or of reading for their author, but are the real treasures of a well-furnished mind. They are, Mr. Trench tells us, ' in the main of my own collecting. I was struck, on referring to the works bearing on the subject, with the large amount

of merely traditional materials which they contained -the same quota tions from the fathers of the church; the same illustrations from classical authors the same passages from modern works on the East; and this while richest mines, especially in the instance of the first. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works. The Critical Heritage gathers together a large body of critical sources on major figures in literature. Each volume presents contemporary responses to a writer's work, enabling student and researcher to read the material themselves. As cooking advanced from simply placing wild grains, seeds, or meat in or near a fire to following some vague notion of food as a pleasing experience, soup-the world's first prepared dish-became the unpretentious comfort food for all of civilization. This book provides a comprehensive and worldwide culinary history of soup from ancient times. Appendices detail vegetables and herbs used in centuries-old soup traditions and offer dozens of recipes from the medieval era through World War II. A full account of the Metaphysical Club, featuring the members' philosophical writings and four critical essays. The Metaphysical Club, a gathering of intellectuals in the 1870s, is widely recognized as the crucible where pragmatism, America's distinctively original philosophy, was refined and proclaimed. Louis Menand's bestseller about the group was a dramatic publishing success. However, only three actual members—Oliver Wendell Holmes Jr., Charles S. Peirce, and William James—appear in the book, alongside other thinkers who were never in the Club. The Real Metaphysical Club tells the full story of how this influential group shifted the course of philosophy in America. In addition to pioneering pragmatism, the group explored radical empiricism and idealism, and formulated personalism and process philosophy, equally important developments. This volume contains the important writings dating from 1870 to 1885 by the real members of the Metaphysical Club. The first section centers on pragmatism and science; the second part collects writings of the lawyers; and the third part covers idealist and personalist philosophers. Many of these writings have never been reprinted before, and nothing like this impressive collection has ever been attempted. A general introduction provides a narrative history, and the editors' three introductions to the volume's sections vividly bring to life the intense meetings, sustained debates, and pioneering thought of the Metaphysical Club. "The Real Metaphysical Club includes some very important thinkers that don't always make it into anthologies of American philosophy. The period is also important. 1870 to 1885 is critical to the development of classical American philosophy. It precedes it and sets its direction. The book accomplishes its goal of giving the reader a sense of the period by arranging the works in a very interesting way. The readings and introduction are very readable and would be helpful to both graduate and undergraduate students as well as general readers interested in American Thought." — James M. McLachlan, Western Carolina University The Critical Heritage gathers together a large body of critical sources on major figures in literature. Each volume presents contemporary responses to a writer's work, enabling student and researcher to

read the work themselves. In the mid-1880s, the Realist author and Anglophile Theodor Fontane observed: nowhere is so much translation done as in Germany. Characterizing Germany as a special locus of literary translation and reception, Fontane contests a prejudice which has since become a significant problem for nineteenth-century German studies, namely the frequent assessment of the epoch as narrowly national. The present collection of essays by thirteen eminent literary scholars and historians is intended to correct this prejudice: it demonstrates that literary life and production in the nineteenth century were governed by complex networks of intercultural exchange, influence and translation, and it does justice to this complexity through its range of complementary critical approaches, focussing on Fontane, Anglo-German relations, translation, and European reception. In so doing, this book not only offers a nuanced appreciation of literary production and reception in the nineteenth century, but also demonstrates the continued relevance of that period for Germanists today. Vols. for 1871-76, 1913-14 include an extra number, *The Christmas bookseller*, separately paged and not included in the consecutive numbering of the regular series. Excerpt from *The St. James's Magazine and United Empire Review*, Vol. 34: July to December, 1878 In the meantime, two persons, who had watched the procession of the League along the dusty road, still lingered by Dr. Singleton's gate. The quiet stars appeared thick and fast in the great vault above them; the gentle breeze of the summer night came over the heath and was welcome after the long, hot day. From the 1750s to the 1830s, numerous British intellectuals, novelists, essayists, poets, playwrights, translators, educationalists, politicians, businessmen, travel writers, and philosophers brooded about the merits and demerits

of the French language. The decades under consideration encompass a particularly tumultuous period in Anglo-French relations that witnessed the Seven Years' War (1756-1763), the American War of Independence (1775-1783), the Revolutionary and Napoleonic Wars (1792-1802 and 1803-1815, respectively), the Bourbon Restoration (1814-1830), and the July Revolution (1830) - not to mention the gradual expansion of the British Empire, and the complex cultural shifts that led from Neoclassicism to Romanticism. In this book, Marcus Tomalin reassesses the ways in which writers such as Tobias Smollett, Maria Edgeworth, William Wordsworth, John Keats, William Cobbett, and William Hazlitt acquired and deployed French. This intricate topic is examined from a range of critical perspectives, which draw upon recent research into European Romanticism, linguistic historiography, comparative literature, social and cultural history, education theory, and translation studies. This interdisciplinary approach helps to illuminate the deep ambivalences that characterised British appraisals of the French language in the literature of the Romantic period. Excerpt from *The Christian Remembrancer*, Vol. 4: A Monthly Magazine and Review; July December It is clear that when this apology is made, it is implied that the teaching of the meaning, or the instruction of the understanding, is a matter of secondary importance, and only worthy of attention after the higher object of teaching the sounds of words, or instructing the external organs, has been accomplished. It is forgotten that expertness in reading is of no value, unless accompanied with corresponding readiness and energy in understanding; and that of two individuals, one of whom has acquired perfect fluency in reading, but without comprehending what he reads, and the other, with half the degree of fluency, has acquired, so far as he has gone, a thorough understanding of words and contexts, the latter has made incomparably the greater progress in substantial and valuable knowledge, even when we give the other credit for so much intellectual acquirement as the mind will generally, by its own Operations, obtain, without the aid or stimulus of direct intellectual instruction. If the truth of this proposition is admitted, it must surely be also admitted as a legitimate consequence, that a little instruction in reading, with the necessary intellectual training to make that reading understood, is better than much exercise in reading, without any intellectual instruction at all.
