From the outside, Laterre seems to be flourishing. But dangerous rifts threaten to shatter the planet from within. Then, it's revealed that the Patriarche had a daughter who is still alive. Marcellus is desperately searching for Alouette, knowing she's the key to the Vangarde's plan to overthrow the corrupt Regime, but unaware that he, himself, is being hunted by a new cyborg tasked with tracking down the planet's most wanted criminals. Meanwhile Chatine is growing restless, living underground with a rebel group she doesn't fit into. Until an old friend solicits her help to save the Défecteur community from a mysterious, new threat. The brand new second volume of the biography of one of Australia's richest, most active and most influential men, Frank Lowy - an extraordinary story of challenge and achievement. Depending on the day, Frank Lowy is either the richest or the second richest man in Australia. His story - from refugee to multi-billionaire - has become part of Australian folklore. Now in his mid 80s, Frank Lowy is still a juggernaut. Since 2000, when his first biography, the bestselling Pushing the Limits, was published, he's kept pushing ahead. Rather than retreating into retirement, Frank Lowy has in fact achieved more in his 'second life' than most do in a lifetime. He has turned Westfield into one of the largest retail property company in the world, dominating retail in London and Australia. He transformed Australian soccer from an insolvent shambles to a profitable mainstream sport. He created Australia's first foreign policy think tank, the Lowy Institute, which has had an impact on the world stage. When his son faced an incurable eye disease, Lowy responded by establishing an international institute to research the disease. Finally, he completed some long unfinished spiritual business by finding an extraordinary way to 'bury' his father, while commemorating the half a million Hungarian Jews who perished at Auschwitz-Birkenau. Although he continued to drive Westfield to be ever more profitable, personal wealth was not a motivator in Lowy's second life. It was all about intangible enrichment, of himself and of others. Covering his successes and failures, the controversies and the triumphs, Frank Lowy: A Second Life gives rare insight into this extraordinary man, his strategies, his pain and his achievements. 'Creative non-fiction at its very best ... Margo has approached [Lowy's life] as would a story-teller. And this approach makes A Second Life one of the most enjoyable biographies it's possible to read. This is biography on steroids, as entertaining as a good novel, as informative as an encyclopaedia.' Jewish News Rights at the Margins explores the ways rights were available to those on the margins and their relationship with social justice in medieval and early modern thought. It also elaborates the relevance of some historical ideas in the contemporary context. This remarkable novel, suppressed in 1957 and published by Dalkey Archive for the first time, is concerned with a day in the life of a stagnant,

aristocratic Scottish family in the 1950s. As the family prepares for its annual Christmas dance, old rivalries and tensions flare as John Harling arrives to visit his sister Mary, who has married Duncan Mackean, next in line to inherit the estate left by Colin Mackean, dead two years now, but very much alive in the memory of the current family, presided over by Alan Mackean and his wife Augustine ("Tin"). By the end of this nerve-racking day, John tells his sister that "this life, which you lead here, is incestuous" and that her husband Duncan "is in love with things he should have left--long ago. Soil, place, family, the past--roots . . . One must have courage to travel light today." That night, Duncan and Alan go out shooting; only one returns alive. The reader, like a visitor, is an outsider who must rely on hints, looks, silences, and unspoken sentences to untangle the web of intrigue that binds this fascinating family. Nicholas Mosley, who knew Charteris at school, tells us that the author of *The Tide is Right* "in his novels . . . tried to describe the complexity of changing attitudes of class-conscious Britain from the inside . . . he wrote not only of the absurdities and irrelevances typical of the British aristocracy but also of the resilience, the earthiness and even the ruthlessness that would enable it in a modified form to survive." Charteris deserves to be compared to Waugh, especially in *A Handful of Dust*--the ironies of primogeniture or high jinks in high places--and *The Tide is Right* should revive his reputation as one of the most significant of postwar British novelists. Fandom has been celebrated both as a harmonious, tolerant space and as apolitical and detached from reality. Yet fandom is neither harmonious nor apolitical. Throughout the past century, fandom has been shaped by recurring controversies and sparked by the emergence of new circles, platforms and discourses. Since the earliest days of science-fiction fandom, fans have conceived of their communities as quasi-political bodies, and of themselves as public actors in discursive spaces. They are concerned with the organizational structures, norms, and borders of fandom as well as their own position within it all. This latter concern has moved to the forefront as fan practices and platforms have been coopted by the entertainment industry and by political actors, forcing fans to situate their fannish and political identities in relation to both sprawling transmedia franchises and right-wing groups exploiting fannish formations for political ends. Through case studies of *Glee* and *The Hunger Games* fandoms as well as events such as Gamergate, RaceFail '09 and the Hugo Awards controversies, this book explores the complexities of political fandom. The Chan family thought all their financial troubles were solved when Mrs. Chan invented a walking, talking robot. However, shortly before Mrs. Chan could sell the robot (dubbed "Manabeth" by the youngest child) Nara Chan went and messed everything up. Nara, the middle child in the Chan family, got sick of Manabeth stealing all the attention, and decided to send the robot off on an impossible task. However, when she realized her mistake and went to go get it back, she didn't realize it was the start of a long adventure that would take her to new places both great and small, and that she would meet people both strange and wonderful. This book deals with the thorny issue of human rights in different cultures and religions, especially in the light of bioethical issues. In this book, experts from Christianity, Judaism, Islam, Buddhism, Daoism, Hinduism and Confucianism discuss the tension between their religious traditions and the claim of universality of human rights. The East-West contrast is particularly evident with regards to human rights. Some writers find the human rights language too individualistic and it is foreign to major religions where the self does not exist in isolation, but is normally immersed in a web of relations and duties towards family, friends, religion community, and society. Is the human rights discourse a predominantly Western liberal ideal, which in bioethics is translated to mean autonomy and free choice? In today's democratic societies, laws have been drafted to protect individuals and communities against slavery, discrimination, torture or genocide. Yet, it appears unclear at what moment universal rights supersede respect for cultural diversity and pluralism. This collection of articles demonstrates a rich spectrum of positions among different religions, as they confront the ever more pressing issues of bioethics and human rights in the modern world. This book is intended for those interested in the contemporary debates on religious ethics, human rights, bioethics, cultural diversity and multiculturalism. Originally published in 1982, this brilliant study provides a perceptive and up-to-date assessment of the novels of Iris Murdoch, up to and including *Nuns and Soldiers*, published in 1980. *The Fire and the Sun*, her book on Plato, is also considered in depth. It is not a critical biography, but rather shows how massive Murdoch's literary career was at the time and what her contribution has been to aesthetics, literary criticism, the realistic novel, and to the possibilities of ethical and religious action in a horror-filled and secular age. Above all, the book is interested in forwarding Murdoch's cause among her readers. It is not aimed simply at those who have read and studied all of her novels, the text will appeal to the readers of only a few of them, as well as literary scholars and students of contemporary fiction and modern culture. Contains entries that discuss aspects of civil rights and liberties, covering major historical developments and social movements, key legislation, Supreme Court decisions, influential individuals, Constitutional provisions, and groups and organizations; arranged alphabetically from A to G. Christopher Rossi's Whiggish International Law refreshes English School and Cambridge contextualist concerns for historical abridgment as jurists and scholars revive complexities and discussions of international law's turbulent history in the Americas. Compares the backgrounds and legal viewpoints of the two Supreme Court justices This book is a judicial, military and political history of the period 1941 to 1954. As such, it is also a United States legal history of both World War II and the early Cold War. Civil liberties, mass conscription, expanded military jurisdiction, property rights, labor relations, and war crimes arising from the conflict were all issues to come before the federal judiciary during this period and well beyond since the Supreme Court and the lower courts heard appeals from the government's wartime decisions well into the 1970s. A detailed study of the judiciary during World War II evidences that while the majority of the justices and judges determined appeals partly on the basis of enabling a large, disciplined, and reliable military to either deter or fight a third world war, there was a recognition of the existence of a tension between civil rights and liberties on the one side and military necessity on the other. While the majority of the judiciary tilted toward national security and deference to the military establishment, the judiciary's recognition of this tension created a foundation for persons to challenge governmental narrowing of civil and individual rights after 1954. Kastenbergh and Merriam present a clearer picture as to why the Court and the lower courts determined the issues before them in terms of external influences from both national and world-wide events. This book is also a study of civil-military relations in wartime so whilst legal scholars will find this study captivating, so will military and political historians, as well as political scientists and national security policy makers. Another weighty regimental history, two volumes, 820 pages in all covering the record of twenty-two battalions in France, Flanders, Italy and Gallipoli (all of them served on the Western Front). When war broke out the regiment consisted of two Regular battalions (1st and 2nd), two Special Reserve (3rd and 4th) and four Territorial battalions (5th to 8th); the 1st Battalion went to France with 6th Division in September 1914, the 2nd Battalion came home from Malta to join the newly formed 8th Division (Regular) and went to France in November 1914. Both battalions remained in the same brigades (18th and 23rd) and divisions throughout the war. The four Territorial battalions each formed a 2nd and a 3rd line battalion; the four original battalions made up the 146th Brigade, 49th (West Riding) Division, arriving in France in April 1915, the second line battalions combined to make the 185th Brigade, 62nd (2nd West Riding) Division which arrived in France in January 1917. Kitchener's call to arms resulted in eleven Service battalions being raised, 9th to 18th (the 17th was formed as a Bantam battalion) and 21st; of these only 13th and 14th did not go on active service. The 21st Battalion became a Pioneer battalion in 4th Division and the 22nd was a Labour battalion which also went to France. This history records events in chronological order, the dates of the operations being described are shown in the margin as are the identities of the battalions involved. Volume 1 (x + 355pp with 18 maps and 15 b/w photos) covers the period from the outbreak of war to the end of 1916, the close of the Somme offensive and includes the Dardanelles campaign where the 9th Battalion was in action with the 11th (Northern) Division. On 1st July 1916, the first day of the Somme, the 10th Battalion attacked at Fricourt and incurred the heaviest casualties of any battalion - 710, of whom 307 were killed including the CO, 2IC, adjutant and two company commanders. More than half of them are in in Fricourt New Military Cemetery which is in the No Man's Land across which they

attacked and where they died. The CO (Lt Col Dickson) and his adjutant (Capt Shann) lie side by side. There is a Roll of Honour for the period covered in which the other ranks are listed alphabetically by battalions as are the Territorial battalion officers; the other officers are shown in one group in alphabetical order with the battalion number in front of the name. Although the note at the head of the officer casualty list states that the theatre in which death occurred is France and Flanders unless otherwise indicated, nonetheless 'Gallipoli' is not shown against the names of the officers of the 9th Battalion who died there, and so one is left with the wrong impression they died on the Western front. 'If I hadn't walked into the room at that moment, maybe everything would have worked out differently. Maybe everything would have been all right after all . . .' The purpose of this study is to examine the rationale of Doris Lessing's development from Classical Realism to mysticism and forms of science fiction and to consider the unifying motifs that appear throughout her novels in her consistent search for Sufi Equilibrium. The four novels selected in this study represent significant stages in Lessing's work. Chapter one focuses on *The Grass is Singing*, which represents the author's early traditionally realistic writing, to show how far the preoccupations of Lessing's later novels find expression in this early work. Chapter two studies *The Golden Notebook*, which marks a turning point in formal structure in Lessing's canon and is selected as evidence of her interest in Sufism at that early stage. Chapter three concentrates on the study of *The Memoirs of a Survivor*, which has elicited a comparatively limited amount of criticism but which proves to be a major achievement when brought into line with Sufi methods of writing. Chapter four considers Lessing's science fiction series, 'Canopus in Argos', tracing sources from Oriental literature - a key which unlocks many areas of obscurity. An introduction to the history of Western political thought written by scholars from four continents. This collection provides an overview of the canon of great theorists from Socrates and the Sophist to contemporary thinkers such as Habermas and Foucault.
