Reprint of the American Army translation of the French Army's guide for platoon commanders for tactics in World War I. This Is A New Release Of The Original 1917 Edition. The M1917 Revolver, formally United States Revolver, Caliber .45, M1917, was a U.S. six-shot revolver of .45 ACP caliber. It was adopted by the U.S. Army in 1917 to supplement the standard M1911 .45 ACP semi-automatic pistol during World War I. After, it was primarily used by secondary and non-deployed troops. There were two variations of the M1917, one from Colt and one from Smith & Wesson. The Colt M1917 Revolver was essentially the same as the M1909 with a cylinder bored to take the .45 ACP cartridge and the half-moon clips to hold the rimless cartridges in position. In early Colt production revolvers, attempting to fire the .45 ACP without the half-moon clips was unreliable at best, as the cartridge could slip forward into the cylinder and away from the firing pin. Later production Colt M1917 revolvers had headspacing machined into the cylinder chambers, just as the Smith & Wesson M1917 revolvers had from the start. The Smith & Wesson Model 1917 was essentially an adaptation of that company's Second Model .44 Hand Ejector, chambered instead for .45 ACP, employing a shortened cylinder allowing for use of half-moon clips, and a lanyard ring on the butt of the frame. After the First World War, M1917s became popular on the civilian and police market. Created in 1941, this field manual reveals a great deal about the M1917's design and capabilities. Intended as a manual for those charged with operation and maintenance, it details many aspects of the gun assembly, accessories and target exercises. Originally labeled restricted, this manual was declassified long ago and is here reprinted in book form. Care has been taken to preserve the integrity of the text. Excerpt from Staff Manual: United States Army, 1917 Through Chief Signal Officer it concerns itself with the efficient working of the radio, telegraph, telephone, cable, and visual communications; and with the coding, decoding, ciphering, and deciphering of messages. The operations section is charged, in peace and in the intervals of active operations in war, with the preparation of plans for the instruction and training of the command for war; the operation of schools for staff, artillery, musketry, bombers, etc.; the preparation of problems, schedules, and critiques, and the conduct of maneuvers. It is a training school for candidates for the General Staff in its utilization of carefully selected officers as learners, assistants. Etc. In both peace and war it watches over the fighting fitness of the command and keeps touch with the state of efficiency of all its organizations. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com This book is a reproduction of an important historical work.
