As distance learning continues to grow, universities are seeking ways to integrate traditional student community service into online courses. Supported by seven years of successful implementation, this book presents an award-winning service-learning model through which online students serve as consultants to organizations nationwide. This book provides an integrated analysis of the methodologies and main processes occurring at the entire river basin, from upstream until the coast, by merging the biological and hydrological processes with the social and economic components, thus providing an integrated framework for river basin management, integrating the ecohydrology approach with the ecosystem services concept. Child Welfare Systems and Migrant Children examines where, why and to what extent immigrant children are represented in the child welfare system in different countries. These countries include Australia/New Zealand, Belgium/the Netherlands, England, Estonia, Canada, Finland, Italy, Germany, Spain, Norway, and the United States--all of them having different child welfare philosophies and systems as well as histories and practices in immigration. By comparing policies and practices in child welfare systems (and welfare states), especially in terms of how they conceptualize and deal with immigrant children and their families, we address an immensely important and pressing issue in modern societies. Immigrants in the child welfare system are a critical issue and they seem to face serious challenges that are evident across countries. These are challenges related to lack of language proficiency, lack of knowledge about cultural and social aspects and about the public systems of the destination country. Perhaps most relevantly, the challenges may include collisions of ideas and beliefs about how to raise children, about children's place in the family and society, and about children's rights. Being deployed to a war zone can result in numerous adverse psychological health conditions. It is well documented in the literature that there are high rates of psychological disorders among military personnel serving in Operation Enduring Freedom in Afghanistan and Operation Iraqi Freedom in Iraq as well as among the service members' families. For service members' families, the degree of hardship and negative consequences rises with the amount of the service members' exposure to traumatic or life-altering experiences. Adult and child members of the families of service members who experience wartime deployments have been found to be at increased risk for symptoms of psychological disorders and to be more likely to use mental health services. In an effort to provide early recognition and early intervention that meet the psychological health needs of service members and their families, DOD currently screens for many of these conditions at numerous points during the military life cycle, and it is implementing structural interventions that support the improved integration of military line personnel, non-medical caregivers, and clinicians, such as RESPECT-Mil (Re-engineering Systems of Primary Care Treatment in the Military), embedded mental health providers, and the Patient-Centered Medical Home. Preventing Psychological Disorders in Service Members and Their Families evaluates risk and protective factors in military and family populations and suggests that prevention strategies are needed at multiple levels - individual, interpersonal, institutional, community, and societal - in order to address the influence that these factors have on psychological health. This report reviews and critiques reintegration programs and prevention strategies for PTSD, depression, recovery support, and prevention of substance abuse, suicide, and interpersonal violence. This book offers new insights into the crucial role of investigative journalism at a pivotal time of technological changes and upheavals. It surveys innovations and unexpected impacts of the field, from past and present challenges, and what may be in store for the future of the industry. The book begins by exploring the increasingly investigative innovations in political and independent reporting, along with a comparison of the rhetoric and reality of a so-called "golden era" of investigative journalism in the past and the present. It goes on to analyse the growth of creative and sports investigative reporting, as well as the ability of contemporary conflict journalism to overcome surmounting challenges. It also examines the capacity of groundbreaking investigations, including data reporting, to expose injustices involving women, indigenous communities and other minorities. In interviews with key industry and research professionals, this book presents the reactions of four media experts to the crises faced by investigative journalism in a digital environment of escalating disinformation, legal restrictions and popular interest in the news. The book concludes by reflecting on previous and current challenges and offers insights into the prospect for investigative journalism of the future. Presenting unique views on the diversity, resilience and transformative power of investigative journalism, this book will be a valuable resource to students and scholars of

journalism, communication, media and politics, as well as professionals already operating within the field of journalism. This book offers a much-needed study of the Victorian novel's role in representing and shaping the service sector's emergence. Arguing that prior accounts of the novel's relation to the rise of finance have missed the emergence of a wider service sector, it traces the effects of service work's many forms and class positions in the Victorian novel. With the rapid growth and interest in food studies around the U.S. and globally, the original essays in this one-of-a-kind volume aid instructors in expanding their teaching to include both the latest scholarship and engage with public debate around issues related to food. The chapters represent the product of original efforts to develop ways to teach both with and about food in the classroom, written by innovative instructors who have successfully done so. It would appeal to community college and university instructors in anthropology and social science disciplines who currently teach or want to develop food-related courses. This book -illustrates the creative ways that college instructors have tackled teaching about food and used food as an instructional device;-aims to train the next generation of food scholars to deal with the complex problems of feeding an ever-increasing population -contains an interview with Sidney Mintz, the most influential anthropologist shaping the study of food A PDF version of this book is available for free in open access via www.tandfebooks.com as well as the OAPEN Library platform, www.oapen.org. It has been made available under a Creative Commons Attribution-Non Commercial-No Derivatives 3.0 license and is part of the OAPEN-UK research project. This book traces the history and development of a mutual organization in the financial sector called SWIFT, the Society for Worldwide Interbank Financial Telecommunication. Over the last forty years, SWIFT has served the financial services sector as proprietary communications platform, provider of products and services, standards developer, and conference organizer ("Sibos"). Founded to create efficiencies by replacing telegram and telex (or 'wires') for international payments, SWIFT now forms a core part of the financial services infrastructure. It is widely regarded as the most secure trusted third party network in the world serving 212 countries and over 10,000 banking organizations, securities institutions and corporate customers. Through every phase of its development, SWIFT has maintained the status of industry cooperative thus presenting an opportunity to study broader themes of globalization and governance in the financial services sector. In this book the authors focus on how the design and current state of SWIFT was influenced by its historical origins, presenting a comprehensive account in a succinct form which provides an informative guide to the history, structure, activities and future challenges of this key international organization. This work will be of great interest to students and scholars in a wide range of fields including IPE, comparative political economy, international economics, business studies and business history. Financial institutions must become more innovative in the conduct of their business. Cloud computing helps to achieve several objectives: innovative services, re-engineered processes, business agility and value optimization. Research, consultancy practice and case studies in this book consider the opportunities and risks with vendor relationships. Cloud Services, Networking and Management provides a comprehensive overview of the cloud infrastructure and services, as well as their underlying management mechanisms, including data center virtualization and networking, cloud security and reliability, big data analytics, scientific and commercial applications. Special features of the book include: State-of-the-art content Self-contained chapters for readers with specific interests Includes commercial applications on Cloud (video services and games) Ecosystem Service Potentials and Their Indicators in Postglacial Landscapes: Assessment and Mapping provides valuable guidance for anyone involved with ecosystem service potential monitoring, use and management—from landscape ecologists and environmental managers, to policymakers and environmental economists. The book highlights effective measurement tools for evaluating the overall potential of ecosystem services from multiple perspectives. Beginning with an introduction to ecosystem services and the theoretical assumptions and objectives associated with their assessment, the book goes on to outline interdisciplinary methods of evaluation and analysis that are fully supported and illustrated throughout using an insightful case study focused on Wigry National Park. A range of different spatial reference units are also discussed, followed by chapters on both analytical and synthetic approaches to identifying service supply potential. In addition, the use of services and the impact of these uses on the assessment of potential is included, along with a discussion of the future shape of ecosystem service assessment. Outlines a transdisciplinary, holistic approach to assessing the overall potential of ecosystems and landscapes to support different ecosystem services Proposes a range of direct, indirect, simple and complex measurement indicators for multifaceted estimation and mapping Presents tools and guidelines to help shape effective decision-making processes in nature conservation and environmental planning Oxford Textbook of Attention Deficit Hyperactivity Disorder is an authoritative, multi-disciplinary text covering the diagnosis, assessment and management of patients with ADHD. Teacher education programs serve traditional and non-traditional students and develop teachers to enter a range of teaching environments. Approaching teacher education through community involvement and learning objectives helps to effectively prepare teachers to serve local and community needs. The Handbook of Research on Service-Learning Initiatives in Teacher Education Programs provides emerging research on the methods and techniques for educators to strengthen their knowledge regarding the intersection of service learning and field placements. While highlighting topics, such as cultural competency, teacher development, and multicultural education, this book explores the benefits, challenges, and opportunities for employing community service as the driving framework for field experiences. This publication is a vital resource for practitioners, educators, faculty, and administrators seeking current research on the opportunity of field involvement to enhance teacher candidates' experiences and provide a channel for meaningful learning. This book constitutes the refereed proceedings of the 15th International Conference on Economics of Grids, Clouds, Systems, and Services, GECON 2018, held in Pisa, Italy, in September 2018. The 21 full papers and 9 short papers presented together with 1 invited talk were carefully reviewed and selected from 40 submissions. This GECON 2018 proceedings was structured in three special sessions on selected topics, namely: IT service ecosystems enabled through emerging digital technologies; machine learning, cognitive systems and data science for system management; and blockchain technologies and economics. Innovations in cloud and service-oriented architectures continue to attract attention by offering interesting opportunities for research in scientific communities. Although advancements such as computational power, storage, networking, and infrastructure have aided in making major progress in the implementation and realization of cloud-based systems, there are still significant concerns that need to be taken into account. Principles, Methodologies, and Service-Oriented Approaches for Cloud Computing aims to present insight into Cloud principles, examine associated methods and technologies, and investigate the use of service-oriented computing technologies. In addressing supporting infrastructure of the Cloud, including associated challenges and pressing issues, this reference source aims to present researchers, engineers, and IT professionals with various approaches in Cloud computing. As social technologies continue to evolve, it is apparent that librarians and their clientele

would benefit through participation in the digital social world. While there are benefits to implementing these technologies, many libraries also face challenges in the integration and usage of social media. *Social Media Strategies for Dynamic Library Service Development* discusses the integration of digital social networking into library practices. Highlighting the advantages and challenges faced by libraries in the application of social media, this publication is a critical reference source for professionals and researchers working within the fields of library and information science, as well as practitioners and executives interested in the utilization of social technologies in relation to knowledge management and organizational development. *Succeeding Together?* is an institutional ethnography that analyses front-line accounts from mothers, teachers, and child welfare workers to explore the educational issues facing abused and neglected children outside of foster care. Rising prison numbers on both sides of the Atlantic are cause for concern. Justice Reinvestment is a major movement in criminal justice reform in the US that is also attracting lots of interest in the UK. Justice Reinvestment is an approach to addressing the penal crisis that uses the best available evidence to re-direct resources to more effective rehabilitation of offenders and better 'prehabilitation'. It takes a more holistic view of criminal justice and is particularly concerned to address the community dimensions of offending and re-offending. The authors highlight competing models of Justice Reinvestment and argue for a more radical version in which criminal justice reform is seen as part of a wider social justice reform programme. This is the first substantial publication on Justice Reinvestment and shows that 'Justice Reinvestment' has huge potential to re-shape the criminal justice system. It will be essential reading for undergraduate and post-graduate students with an interest in criminal justice reform. Practitioners and policy-makers working in the criminal justice system in the US and the UK will also value the fresh perspective it brings to criminal justice reform and its breadth of coverage including insights into the penal crisis, different models of Justice Reinvestment, the use of criminal justice data and research evidence in re-designing criminal justice services and new approaches to commissioning. The term "queer cinema" is often used to name at least three cultural events: 1) an emergent visual culture that boldly identifies as queer; 2) a body of narrative, documentary, and experimental work previously collated under the rubric of homosexual or lesbian, gay, bisexual, and trans (LGBT) cinema; 3) a means of critically reading and evaluating films and other visual media through the lens of sexuality. By this expansive account, queer cinema encompasses more than a century of filmmaking, film criticism, and film reception, and the past twenty-five years have seen the idea of "queer cinema" expand further as a descriptor for a global arts practice. As the first of its kind, *The Oxford Handbook of Queer Cinema* treats these three currents as art and critical practice, bringing the canon of queer cinema together with a new generation of makers and scholars. The Handbook's contributors include scholars who research the worldwide canon of queer cinema, those who are uniquely positioned to address three decades of its particular importance, and those best positioned to ponder the forms it is taking or may take in our new century, namely digital media that moves in new circuits. In eight sections, they explore the many forms that queer cinema takes across time, discussing narrative, experimental, documentary, and genre filmmaking, including pornography. Likewise, although the study of cinema and media is not restricted to a single method, chapters showcase the unique combination of textual analysis, industrial and production history, interpretation, ethnography, and archival research that this field enables. For example, chapters analyze the ways in which queer cinema both is and is not self-evidently an object for study by examining films that reinforce negative understandings of queerness alongside those that liberate the subject; and by naming the films that are newly queered, while noting that many queerly-made texts await discovery. Finally, chapters necessarily assert that queer cinema is not an Anglophone phenomenon, nor is it restricted to the medium of film. For the past decade, suicidal behavior in military and veteran populations has been a constant feature in the news and in the media, with suicide rates among active duty American military personnel reaching their highest level in almost three decades. *Handbook of Military and Veteran Suicide* reviews the most advanced scientific understanding of the phenomenon of active duty and veteran suicide, while providing a useful, hands-on clinical guide for those working with this population. This comprehensive Handbook covers all relevant topics and current research in suicide in military and veteran populations, including links between suicide and PTSD, the stigma of mental health treatment in the military, screening for firearms access in military and veteran populations, "subintentioned" suicide (e.g. reckless driving and other such "accidental" deaths), women in combat, and working with families. Chapters also cover suicide risk assessment, ethical issues in treating suicidal patients, evidence-based treatments for PTSD, traumatic brain injury, and managing suicide in older veterans. Significant issues that may arise in assessing and treating military and veteran populations who are at risk for suicide are presented and discussed with evidence-based and practical recommendations. This Handbook will benefit researchers, policy makers, and clinicians who work with active duty military and veteran populations. *Encyclopedia of Human Services and Diversity* is the first encyclopedia to reflect the changes in the mission of human services professionals as they face today's increasingly diverse service population. Diversity encompasses a broad range of human differences, including differences in ability and disability, age, education level, ethnicity, gender, geographic origin, religion, sexual orientation, socioeconomic class, and values. Understanding the needs and problems of Asian Americans, Hispanic Americans, the deaf, the blind, the LGBT community, and many other groups demands an up-to-date and cutting-edge reference. This three-volume encyclopedia provides human services students, professors, librarians, and practitioners the reference information they need to meet the needs of an increasingly diverse population. Features: 600 signed entries are organized A-to-Z across three volumes. Entries, authored by key figures in the field, conclude with cross references and further readings. A Reader's Guide groups related articles within broad, thematic areas, such as aging, community mental health, family and child services, substance abuse, etc. A detailed index, the Reader's Guide, and cross references combine for search-and-browse in the electronic version. A helpful Resource Guide guides students to classic books, journals, and web sites, and a glossary assists them with the terminology of the field. Available in both print and electronic formats, *Encyclopedia of Human Services and Diversity* is an ideal reference for students, practitioners, faculty and librarians. Academic Paper from the year 2019 in the subject Business economics - Customer Relationship Management, CRM, , language: English, abstract: This research tries to examine the impact of service quality on customer satisfaction in Banking Industry of India. The researcher has collected primary data from 850 customers of public, private and foreign sector banks operating in the northern region of India namely Delhi NCR, Uttar Pradesh, Rajasthan and Punjab. The researcher also took feedback from 50 bankers including one Senior Manager from each Bank to analyze their perspective and initiatives taken at strategic level to ensure optimum customer satisfaction is provided. The data was collected through a structured questionnaire for both customers and bankers. The secondary data was collected from academic journals, bank annual reports and credible websites. The aim of this research is specifically to analyze the dimensions of the perceived and expected service quality and its effects on customer satisfaction. Customer

satisfaction is paramount to any sector which provides service and needs to sustain its advantage over the competitors. The Banking Industry of India is highly competitive with the advent of recent entrants into the market functioning along with well-established Banks. It becomes imperative for senior management of banks to focus on quality of services and products offered to customers to ensure their growth and retention. Banks need to continuously innovate their methodologies and techniques to remain at the fore front. Even though the different sector of Banks in India are making huge efforts in achieving this objective, there is not enough proof to demonstrate comparative analysis of how customer satisfaction is impacted by the quality of their services, leaving a major gap in Indian literature. The idea that nature provides services to people is one of the most powerful concepts to have emerged over the last two decades. It is shaping our understanding of the role that biodiverse ecosystems play in the environment and their benefits for humankind. As a result, there is a growing interest in operational and methodological issues surrounding ecosystem services amongst environmental managers, and many institutions are now developing teaching programmes to equip the next generation with the skills needed to apply the concepts more effectively. This handbook provides a comprehensive reference text on ecosystem services, integrating natural and social science (including economics). Collectively the chapters, written by the world's leading authorities, demonstrate the importance of biodiversity for people, policy and practice. They also show how the value of ecosystems to society can be expressed in monetary and non-monetary terms, so that the environment can be better taken into account in decision making. The significance of the ecosystem service paradigm is that it helps us redefine and better communicate the relationships between people and nature. It is shown how these are essential to resolving challenges such as sustainable development and poverty reduction, and the creation of a green economy in developing and developed world contexts. The Transportation Experience explores the historical evolution of transportation modes and technologies. The book traces how systems are innovated, planned and adapted, deployed and expanded, and reach maturity, where they may either be maintained in a polished obsolesce often propped up by subsidies, be displaced by competitors, or be reorganized and renewed. An array of examples supports the idea that modern policies are built from past experiences. William Garrison and David Levinson assert that the planning (and control) of nonlinear, unstable processes is today's central transportation problem, and that this is universal and true of all modes. Modes are similar, in that they all have a triad structure of network, vehicles, and operations; but this framework counters conventional wisdom. Most think of each mode as having a unique history and status, and each is regarded as the private playground of experts and agencies holding unique knowledge, operating in isolated silos. However, this book argues that while modes have an appearance of uniqueness, the same patterns repeat: systems policies, structures, and behaviors are a generic design on varying modal cloth. In the end, the illusion of uniqueness proves to be myopic. While it is true that knowledge has accumulated from past experiences, the heavy hand of these experiences places boundaries on current knowledge; especially on the ways professionals define problems and think about processes. The Transportation Experience provides perspective for the collections of models and techniques that are the essence of transportation science, and also expands the boundaries of current knowledge of the field. This book constitutes the thoroughly refereed post-conference proceedings of the Third International ICST Conference on Personal Satellite Services, PSATS 2011, held in Malaga, Spain, in February 2011. The 33 revised full papers presented were carefully reviewed and selected and cover a wide range of topics such as multimedia IP, next generation satellite networks, bandwidth allocation, aeronautic communications for air traffic management, DVB-S2, hybrid networks, delay tolerant networking, channel estimation and interference management, satellite antenna design, and localization systems. USDA Forest Service Experimental Forests and Ranges (EFRs) are scientific treasures, providing secure, protected research sites where complex and diverse ecological processes are studied over the long term. This book offers several examples of the dynamic interactions among questions of public concern or policy, EFR research, and natural resource management practices and policies. Often, trends observed – or expected -- in the early years of a research program are contradicted or confounded as the research record extends over decades. The EFRs are among the few areas in the US where such long-term research has been carried out by teams of scientists. Changes in society's needs and values can also redirect research programs. Each chapter of this book reflects the interplay between the ecological results that emerge from a long-term research project and the social forces that influence questions asked and resources invested in ecological research. While these stories include summaries and syntheses of traditional research results, they offer a distinctly new perspective, a larger and more complete picture than that provided by a more typical 5-year study. They also provide examples of long-term research on EFRs that have provided answers for questions not even imagined at the time the study was installed. Focusing on children who are subject to welfare intervention, *Protecting Children* addresses the challenges and issues of the child welfare system and provides foundational knowledge on the theoretical and practical aspects of the field. This edited collection begins with a review of key concepts, including child development, attachment, and resilience theories; social policies; family law; and ethics. Highlighting the translation of theory into practice, the contributors discuss current services and the search for best practice internationally, as well as explore Indigenous child welfare and offer conclusions and recommendations to promote positive outcomes for children and families involved in the system. Scholars, researchers, and practitioners from across the globe provide insight on a wide range of timely issues, such as the risk of reductionism, limits to predictability, pragmatic issues, as well as the disproportional presence in the care system of minority groups, including Indigenous children, children of new immigrants and refugees, children in LGBTQ communities, and children of the poor. This foundational volume is an important resource for courses in social work and child welfare. *FEATURES* - includes contributions from researchers, practitioners, and scholars from Australia, Canada, New Zealand, the United Kingdom, and the United States - highlights Indigenous authors and personal stories of service users, and includes figures and tables throughout the text, as well as section introductions and conclusions to situate main theories and concepts for students. This timely book introduces social aspects of the study of sexual health and their application to public health practice. The book addresses five key themes: Conceptual and theoretical aspects of sexual health, Sexual health outcomes of Risk and Vulnerability, Improving sexual health status and Measuring and assessing sexual health status. The authors consider each of these themes within their cultural and historical context and illustrate topics with international examples and case studies. Key features of the book include: A spotlight on populations rather than individuals, and a focus on the prevention of ill health and promotion of well being. A global perspective; the book makes the distinction between developing and developed countries, but recognises that inequalities are to be found within as well as between countries. A view of sexual behaviour as socially learned rather than biologically given and so as amenable to change and intervention to improve sexual health status. An emphasis on ways in which risk and vulnerability are products, not only of individual behaviours, but of the social context in which they are practiced. Written by

authors with a wide range of experience, this book will be a valuable resource for public health practitioners and those studying and working in the area of sexual health. Understanding Public Health is an innovative series published by Open University Press in collaboration with the London School of Hygiene & Tropical Medicine. Series Editors: Ros Plowman and Nicki Thorogood Contributors: Sevgi O Aral, Chris Bonell, Helen Burchett, Joanna Busza, Martine Collumbien, Simon Forrest, Rebecca French, Claudia Garcia-Moreno, Anna Glasier, Jami Leichliter, Kirstin Mitchell, Will Nutland, Thomas Peterman, Elisabeth Pisani, Kaye Wellings, Meg Wiggins and Maria Zuurmond. Provides a clear understanding of the law governing electronic funds transfers, with emphasis on global and domestic wire transfers, ACH payments and consumer transactions. Concise analysis of U.C.C. Article 4A, EFTA, Regulation E and other pertinent law gives you the information you need to understand the complex legal ramifications of electronic funds transfers. Details the law on such topics as: • Acceptance, rejection, and execution • Sender's payment obligation to accepting bank • Liability for unauthorized payment orders • Errors in payment orders and acceptance • Cancellations, amendment, and reversal • Damages for improper execution • Beneficiary's rights: notice, payment, and discharge First published in 1992.

Encyclopedia of Bioinformatics and Computational Biology: ABC of Bioinformatics combines elements of computer science, information technology, mathematics, statistics and biotechnology, providing the methodology and in silico solutions to mine biological data and processes. The book covers Theory, Topics and Applications, with a special focus on Integrative –omics and Systems Biology. The theoretical, methodological underpinnings of BCB, including phylogeny are covered, as are more current areas of focus, such as translational bioinformatics, cheminformatics, and environmental informatics. Finally, Applications provide guidance for commonly asked questions. This major reference work spans basic and cutting-edge methodologies authored by leaders in the field, providing an invaluable resource for students, scientists, professionals in research institutes, and a broad swath of researchers in biotechnology and the biomedical and pharmaceutical industries. Brings together information from computer science, information technology, mathematics, statistics and biotechnology Written and reviewed by leading experts in the field, providing a unique and authoritative resource Focuses on the main theoretical and methodological concepts before expanding on specific topics and applications Includes interactive images, multimedia tools and crosslinking to further resources and databases An accountable care organization (ACO) is a healthcare organization characterized by a payment and care delivery model that seeks to tie provider reimbursements to quality metrics and reductions in the total cost of care for an assigned group of patients. Accountable Care Organizations: Value Metrics and Capital Formation explores the historical background and evolution of the ACO model as the basis for the development of the value metrics and capital formation analyses that are foundational to assessing the current efficacy and capacity for change. The book examines the four pillars of value in the healthcare industry: regulatory, reimbursement, competition, and technology in addressing the value metrics of ACOs, including requirements for capital formation, financial feasibility, and economic returns. It focuses the discussion of non-monetary value on a review of aspects of population health within the context of such objectives as improved quality outcomes and access to care. Explains why ACOs might be the cost-containment and quality improvement answer the industry has been looking for Describes the circumstances and capital structures where ACOs represent a sound investment Includes a foreword by Peter A. Pavarini, Esq. The book examines the positive externalities of the ACO model, including results for third parties outside the basic construct of the ACO contracts shared savings payments. It also discusses the potential role and opportunities for consultants in assisting their provider clients in the consideration, development, implementation, and operation of an ACO. The second edition of Services Marketing, with an enhanced conceptual foundation, meets this requirement of students, managers and marketing professionals. The enhanced pedagogy and coverage in this edition in conjunction with the lucid and pithy style of the author make this book perfect for students of business administration, commerce and management. Electronic business is a major force shaping the digital world. Yet, despite of years of research and standardization efforts, many problems persist that prevent e-business from achieving its full potential. Problems arise from different data vocabularies, classification schemas, document names, structures, exchange formats and their varying roles in business processes. Non-standardized business terminology, lack of common acceptable and understandable processes (grammar), and lack of common dialog rules (protocols) create barriers to improving electronic business processes. Handbook of Research on E-Business Standards and Protocols: Documents, Data and Advanced Web Technologies contains an overview of new achievements in the field of e-business standards and protocols, offers in-depth analysis of and research on the development and deployment of cutting-edge applications, and provides insight into future trends. This book unites new research that promotes harmony and agreement in business processes and attempts to choreograph business protocols and orchestrate semantic alignment between their vocabularies and grammar. Additionally, this Handbook of Research discusses new approaches to improving standards and protocols, which include the use of intelligent agents and Semantic Web technology.
