Speech and Drama Feb 09 2021 In this course, designed for students and professionals in the stage arts, Rudolf Steiner begins with a fundamental and spiritually-rooted appreciation of human speech and what actually takes place during human communication. Speech is a spiritual activity as well as an art form, lending itself to real interaction with both higher spiritual worlds and the human world of social conversation. Steiner shows that speech is a powerful tool for any serious dramatist in conveying the reality of worlds, whether visible or invisible, to the individual souls in the audience. This is an essential book for anyone involved in speech work, communication arts, and many kinds of therapies.

Image and Narrative Apr 25 2022 Image plus narrative equals tableau--or "scenicity," as authors Jaroslav Vostr and Miroslav Vojte?chovsk y describe the phenomenon of staging, in the visual and dramatic arts and in commerce. In this original and imaginative volume, scenicity is taken to describe any creative arrangement in a constructed, bounded space that is designed for viewing. This phenomenon, of course, has a history, and Vostr and Vojte?chovsk y look at the emergence of scenicity in painting and performance art (Masaccio, Vermeer, Duchamp, Dali, Beuys), staged photography (Daguerre, Halsman, Sherman, Crewdson, Witkin) and theater design (Palladio, Kysela), as well as in commerce, as a device in the staging of commercial goods in shop windows and advertising.

A History of Chinese Theatre in the 20th Century Oct 27 2019 The 20th century was a dynamic period for the theatrical arts in China. Booming urban theatres, the interaction between commercial practice and theatre, dramas staged during the War of Resistance against Japan and a healthy dialogue between Western and Eastern theatres all contributed to the momentousness of this period. The four volumes of A History of Chinese Theatre in the 20th Century display the developmental trajectories of Chinese theatre over those 100 years. This volume deals with the development of Chinese theatre from 1949 to 2000, covering the fluctuations of 'drama reform', spectacles of the 'Cultural Revolution', and theatre in the immediate years before the opening up of the country. The author demonstrates how Chinese dramatic traditions endured and adapted in the face of modernity and how politics and art interacted. By combining academic rigour with a high degree of readability, this volume is both an essential guide for scholars and students in the history of the arts and general readers interested in Chinese theatre.

Education and Dramatic ArtNov 28 2019 To this day, Education and Dramatic Art remains the only fully worked critique of drama education in schools. Provocative and iconoclastic, this new edition brings the argument up-to-date and locates the author's proposals for a curriculum based on the making, performing and appraisal of dramas securely in the evolving culture of schools. The first section of the book traces the origins and fortunes of drama in schools in the context of changing political times and argues that by neglecting the customs and practices of the theatre, drama-in-education has often kept from the students it professes to empower, the very knowledge and understanding necessary for them to take command of their subject. Part two examines the developmental and pedagogic claims of drama-in-education. Theories of knowledge and meaning and assumptions about schools drama's power to establish a moral and social agenda, are all called to account. Finally, Education and Dramatic Art proposes a multiculturally-based, theoretical structure for the teaching of drama which pulls the theatre and the classroom together and offers teachers the foundation for a broad and balanced drama curriculum with its own distinctive body of knowledge and skills.

Relevance and Marginalisation in Scandinavian and European Performing Arts 1770-1860Sep 18 2021 Relevance and Marginalisation in Scandinavian and European Performing Arts 1770-1860: Questioning Canons reveals how various cultural processes have influenced what has been included, and what has been marginalised from canons of European music, dance, and theatre around the turn of the nineteenth century and the following decades. This collection of essays includes discussion of the piano repertory for young ladies in England; canonisation of the French minuet; marginalisation of the popular German dramatist Kotzebue from the dramatic canon; dance repertory and social life in Christiania (Oslo); informal cultural activities in Trondheim; repertory of Norwegian musical clocks; female itinerant performers in the Nordic sphere; preconditions, dissemination, and popularity of equestrian drama; marginalisation and amateur staging of a Singspiel by the renowned Danish playwright Oehlenschläger, also with perspectives on the music and its composers; and the perceived relevance of Henrik Ibsen's staged theatre repertory and early dramas. By questioning established notions about canon, marginalisation, and relevance within the performing arts in the period 1770-1860, this book asserts itself as an intriguing text both to the culturally interested public and to scholars and students of musicology, dance research, and theatre studies.

Philosophy of the Performing ArtsDec 10 2020 PHILOSOPHY OF THE PERFORMING ARTS "David Davies's Philosophy of the Performing Arts is long-awaited. Not since Paul Thom's For an Audience has a book in the Anglo-American philosophical tradition focused so clearly, exclusively, informatively, and fairly on all the performing arts. I will use this book in my classes." James Hamilton, Kansas State University, author of The Art of Theater "In this outstanding philosophical study, David Davies subjects the different, conflicting literatures characterizing works, performances, and their relationships to critical review en route to developing his own integrated theory. Covering classical music to jazz, Shakespeare to Brecht, dance to performance art, this is essential reading for anyone interested in the performing arts." Stephen Davies, University of Auckland, author of The Philosophy of Art Philosophical inquiry concerning

the performing arts has tended to focus on music – specifically classical music – which is assumed to provide a model for understanding the performing arts as a whole. This book engages with this belief and critically explores how the “classical paradigm” might be extended to other musical genres, to theater, and to dance. Taking in key components of artistic performance – improvisation, rehearsal, the role of the audience, the embodied nature of the artistic performer – the book examines similarities and differences between the performing art forms and presents the key philosophical issues that they bring into play. These reflections are then applied to the disputed issue of those contemporary artworks usually classified as “performance art.” Assuming no prior knowledge of the subject matter, this book provides an accessible, yet sophisticated, introduction to the field and a comprehensive framework for thinking about the performing arts.

Education In Drama Jan 11 2021 Hornbrook, referring to current legislation, argues the case for an organized curricular framework for drama in the 1990s which develops in children the activities of designing, directing, acting, writing and evaluating - all within the range of the historic context of dramatic work. He asserts that recent drama teaching in Britain has been child-centred and psychological, and viewed as a learning medium rather than as an aesthetic study in itself. This, he believes, has had the effect of cutting children off from the variegated world of the theatre and, in the broader sense, from any collective aesthetic or historical dimension. This book is intended mainly for the use of primary and secondary school teachers.

Barbara E. Thornbury explores how “Japan” and “Japanese culture” have been constructed, reconstructed, and transformed in response to the hundreds of productions that have taken place over the past sixty years in New York, the main entry point and

defining cultural nexus in the United States for the global touring market in the performing arts. The author's transdisciplinary approach makes the book appealing to those in the performing arts studies, Japanese studies, and cultural studies.

Performing Arts in Transition Oct 20 2021 Artists especially from dance and performance art as well as opera are involved to an increasing degree in the transfer between different media, not only in their productions but also the events, materials, and documents that surround them. At the same time, the focus on that which remains has become central to any discussion of performance. Performing Arts in Transition explores what takes place in the moments of transition from one medium to another, and from the live performance to that which "survives" it. Case studies from a broad range of interdisciplinary scholars address phenomena such as: The dynamics of transfer between the performing and visual arts. The philosophy and terminologies of transitioning between media. Narratives and counternarratives in historical re-creations. The status of chronology and the document in art scholarship. This is an essential contribution to a vibrant, multidisciplinary and international field of research emerging at the intersections of performance, visual arts, and media studies.

The Dramatic Art of Athol Fugard Dec 22 2021 "Albert Wertheim's study of Fugard's plays is both extremely insightful and beautifully written... This book is aimed not only at teachers, students, scholars, and performers of Fugard but also at the person who simply loves going to see a Fugard play at the theatre." --Nancy Topping Bazin, Eminent Scholar and Professor Emerita, Old Dominion University Athol Fugard is considered one of the most brilliant, powerful, and theatrically astute of modern dramatists. The energy and poignancy of his work have their origins in the institutionalized racism of his native South Africa, and more recently in the issues facing a new South Africa after apartheid. Albert Wertheim analyzes the form and content of Fugard's dramas, showing that they are more than a dramatic chronicle of South African life and racial problems. Beginning with the specifics of his homeland, Fugard's plays reach out to engage more far-reaching issues of human relationships, race and racism, and the power of art to evoke change. The Dramatic Art of Athol Fugard demonstrates how Fugard's plays enable us to see that what is performed on stage can also be performed in society and in our lives; how, inverting Shakespeare, Athol Fugard makes his stage the world.
