"Without a map key, some maps would not be able to be understood at all! The symbols found in the legend, or key, tell what resources a place has, how a country's borders have changed over the course of its history, and so much more. In this helpful book, readers are introduced to common map key symbols and learn how they can be used on all kinds of maps, from political to physical maps. Full-color examples of maps with simple keys help readers apply their new knowledge immediately"-- Finding a way of simultaneously addressing the sensory, motor,

emotional, communicative, cognitive and social needs of children on the autism spectrum can be a real challenge, and choosing from the vast array of options available is a daunting task. This book provides a blueprint for an educational intervention program that is evidence-based, comprehensive in scope and integrative in its approach. Grouping techniques into five categories for discussion, the book examines autism spectrum disorders within a developmental context, and shows that interventions with autistic individuals are not only possible, but can be really successful. Specific intervention strategies and program examples for developing competencies in areas such as joint attention, sensory integration, motor functioning, impulse control, memory, self-awareness, theory of mind and empathy, abstract thinking, problem-solving, social skills and community engagement, are presented. Techniques for dealing with specific behavior problems are also examined, including toileting

delays, temper-tantrums, and eating and sleeping problems, amongst many others. This book will be essential reading for families, teachers, and other professionals working with children with autism. See it * Hear it * Play it! A DVD is included with every book in Alfred's MAX[T] Series, offering maximum instruction at a minimum price. be recommending it to my students!" - John Boarder, Bangor University "This book provides a valuable and innovative contribution to the field of Learning Disabilities." - Logan Parumal, University of Manchester Key Concepts in Learning Disabilities is a handy guide to the topics you need to know about whether studying or working in the field of Learning Disabilities. The A-Z format allows you to "dip in" and quickly find relevant information on topics ranging from Autism to Rights and from Advocacy to Challenging Behaviours. Each entry features: - a snapshot definition of the concept; - a broader discussion of the main issues and applications to practice; - key points; - a case study, and - signposts to further reading. Key Concepts in Learning Disabilities is an ideal companion to study and particularly useful for those completing academic assignments as part of training. Written by a team of experienced practitioners and lecturers, the book reflects the multi-disciplinary nature of contemporary

practice. The contents of this book and the way they have been presented are very appropriate for the promotion of debate among researchers, and for the encouragement of new related research. In short, it is a good book, affordable and easy to read, with motivational content, full of useful information for a broad readership and will lead to new projects and related research. *Learning in a Musical Key* examines the multidimensional problem of the relationship between music and theological education. Lisa Hess argues that, in a delightful and baffling way, musical learning has the potential to significantly alter and inform our conception of the nature and process of theological learning. In exploring this exciting intersection of musical learning and theological training, Hess asks two probing questions. First, What does learning from music in a performative mode require? Classical modes of theological education often founder on a dichotomy between theologically musical and educational discourses. It is

extremely difficult for many to see how the perceivedly nonmusical learn from music. Is musicality a universally human potential? In exploring this question Hess turns to the music-learning theory of Edwin Gordon, which explores music's unique mode of teaching/learning, its primarily aural-oral mode. This challenge leads to the study's second question: How does a theologian, in the disciplinary sense, integrate a performative mode into critical discourse? Tracking the critical movements of this problem, Hess provides an inherited, transformational logic as a feasible path for integrating a performative mode into multidimensional learning. This approach emerges as a distinctly relational, embodied, multidimensional, and non-correlational performative-mode theology that breaks new ground in the contemporary theological landscape. As an implicitly trinitarian method, rooted in the relationality of God, this non-correlational method offers a practical theological contribution to the discipline of

Christian spirituality, newly claimed here as a discipline of transformative teaching/learning through the highly contextualized and self-implicated scholar into relationally formed communities, and ultimately into the world. Illustrated with charts and diagrams throughout, this guide teaches the fundamentals of keyboards--from buying a keyboard and understanding its mechanisms to reading music and playing chords. This 50-hour free course provided guidance on how to learn, showing how existing skills can be assessed, improved and adapted to serve new situations. This book presents a selection of the best contributions to GIREP EPEC 2015, the Conference of the International Research Group on Physics Teaching (GIREP) and the European Physical Society's Physics Education Division (EPS PED). It introduces readers interested in the field to the problem of identifying strategies and tools to improve physics teaching and learning so as to convey Key Competences and help students acquire them. The main topic of the conference was Key Competences (KC) in physics teaching and learning in the form of knowledge, skills and attitudes that are fundamental for every member of society. Given the role of physics as a field strongly connected not only to digital competence but also to several other Key

Competences, this conference provided a forum for in-depth discussions of related issues. This state-of-the-art survey is dedicated to the memory of Emmanuil Markovich Braverman (1931-1977), a pioneer in developing machine learning theory. The 12 revised full papers and 4 short papers included in this volume were presented at the conference "Braverman Readings in Machine Learning: Key Ideas from Inception to Current State" held in Boston, MA, USA, in April 2017, commemorating the 40th anniversary of Emmanuil Braverman's decease. The papers present an overview of some of Braverman's ideas and approaches. The collection is divided in three parts. The first part bridges the past and the present and covers the concept of kernel function and its application to signal and image analysis as well as clustering. The second part presents a set of extensions of Braverman's work to issues of current interest both in theory and applications of machine learning. The third part includes short essays by

a friend, a student, and a colleague. This book enables readers to understand the key issues underpinning e-learning with a view to enabling them to use it effectively in their professional practice. This is a fascinating book about coaching with emphasis on learning, application and practice, as they tackle the most profound issues of coaching. The book covers coaching, from definitions and historical aspects to aspects of learning and change in a very pedagogical way, which helps the reader to understand, analyse, explain, learn, apply and practice the essence of coaching as a collaborative process. This book presents seminal readings from existing literature alongside specially commissioned, critical vignettes from leading thinkers with interests in sustainable development and learning. The book sets out to inform readers about the many perspectives that exist, and to challenge assumptions they may have about both sustainable development and learning. Through the readings and vignettes,

the book raises wide-ranging issues of how we choose to act. Following the format of its companion volume, Sustainable Development and Learning: framing the issues, the book builds on existing work across a number of fields as well as on original international research. Key Issues in Sustainable Development and Learning: a critical review is a major resource for anyone studying for masters degrees focusing on environment and sustainable development. It is also a valuable tool for professionals in both public and private sector who are dealing with these issues daily. Bill and Steve's book for Routledge, Sustainable Development and Learning: framing the issues is one of the academic sources cited by the United Nations in its draft international implementation scheme for the Decade of Education for Sustainable Development (which was launched by Kofi Annan last month).
